BULLISH OB

Which swing makes the MSB? So, the last RED candlestick starts that swing our BULLISH ORDER BLOCK (DEMAND)

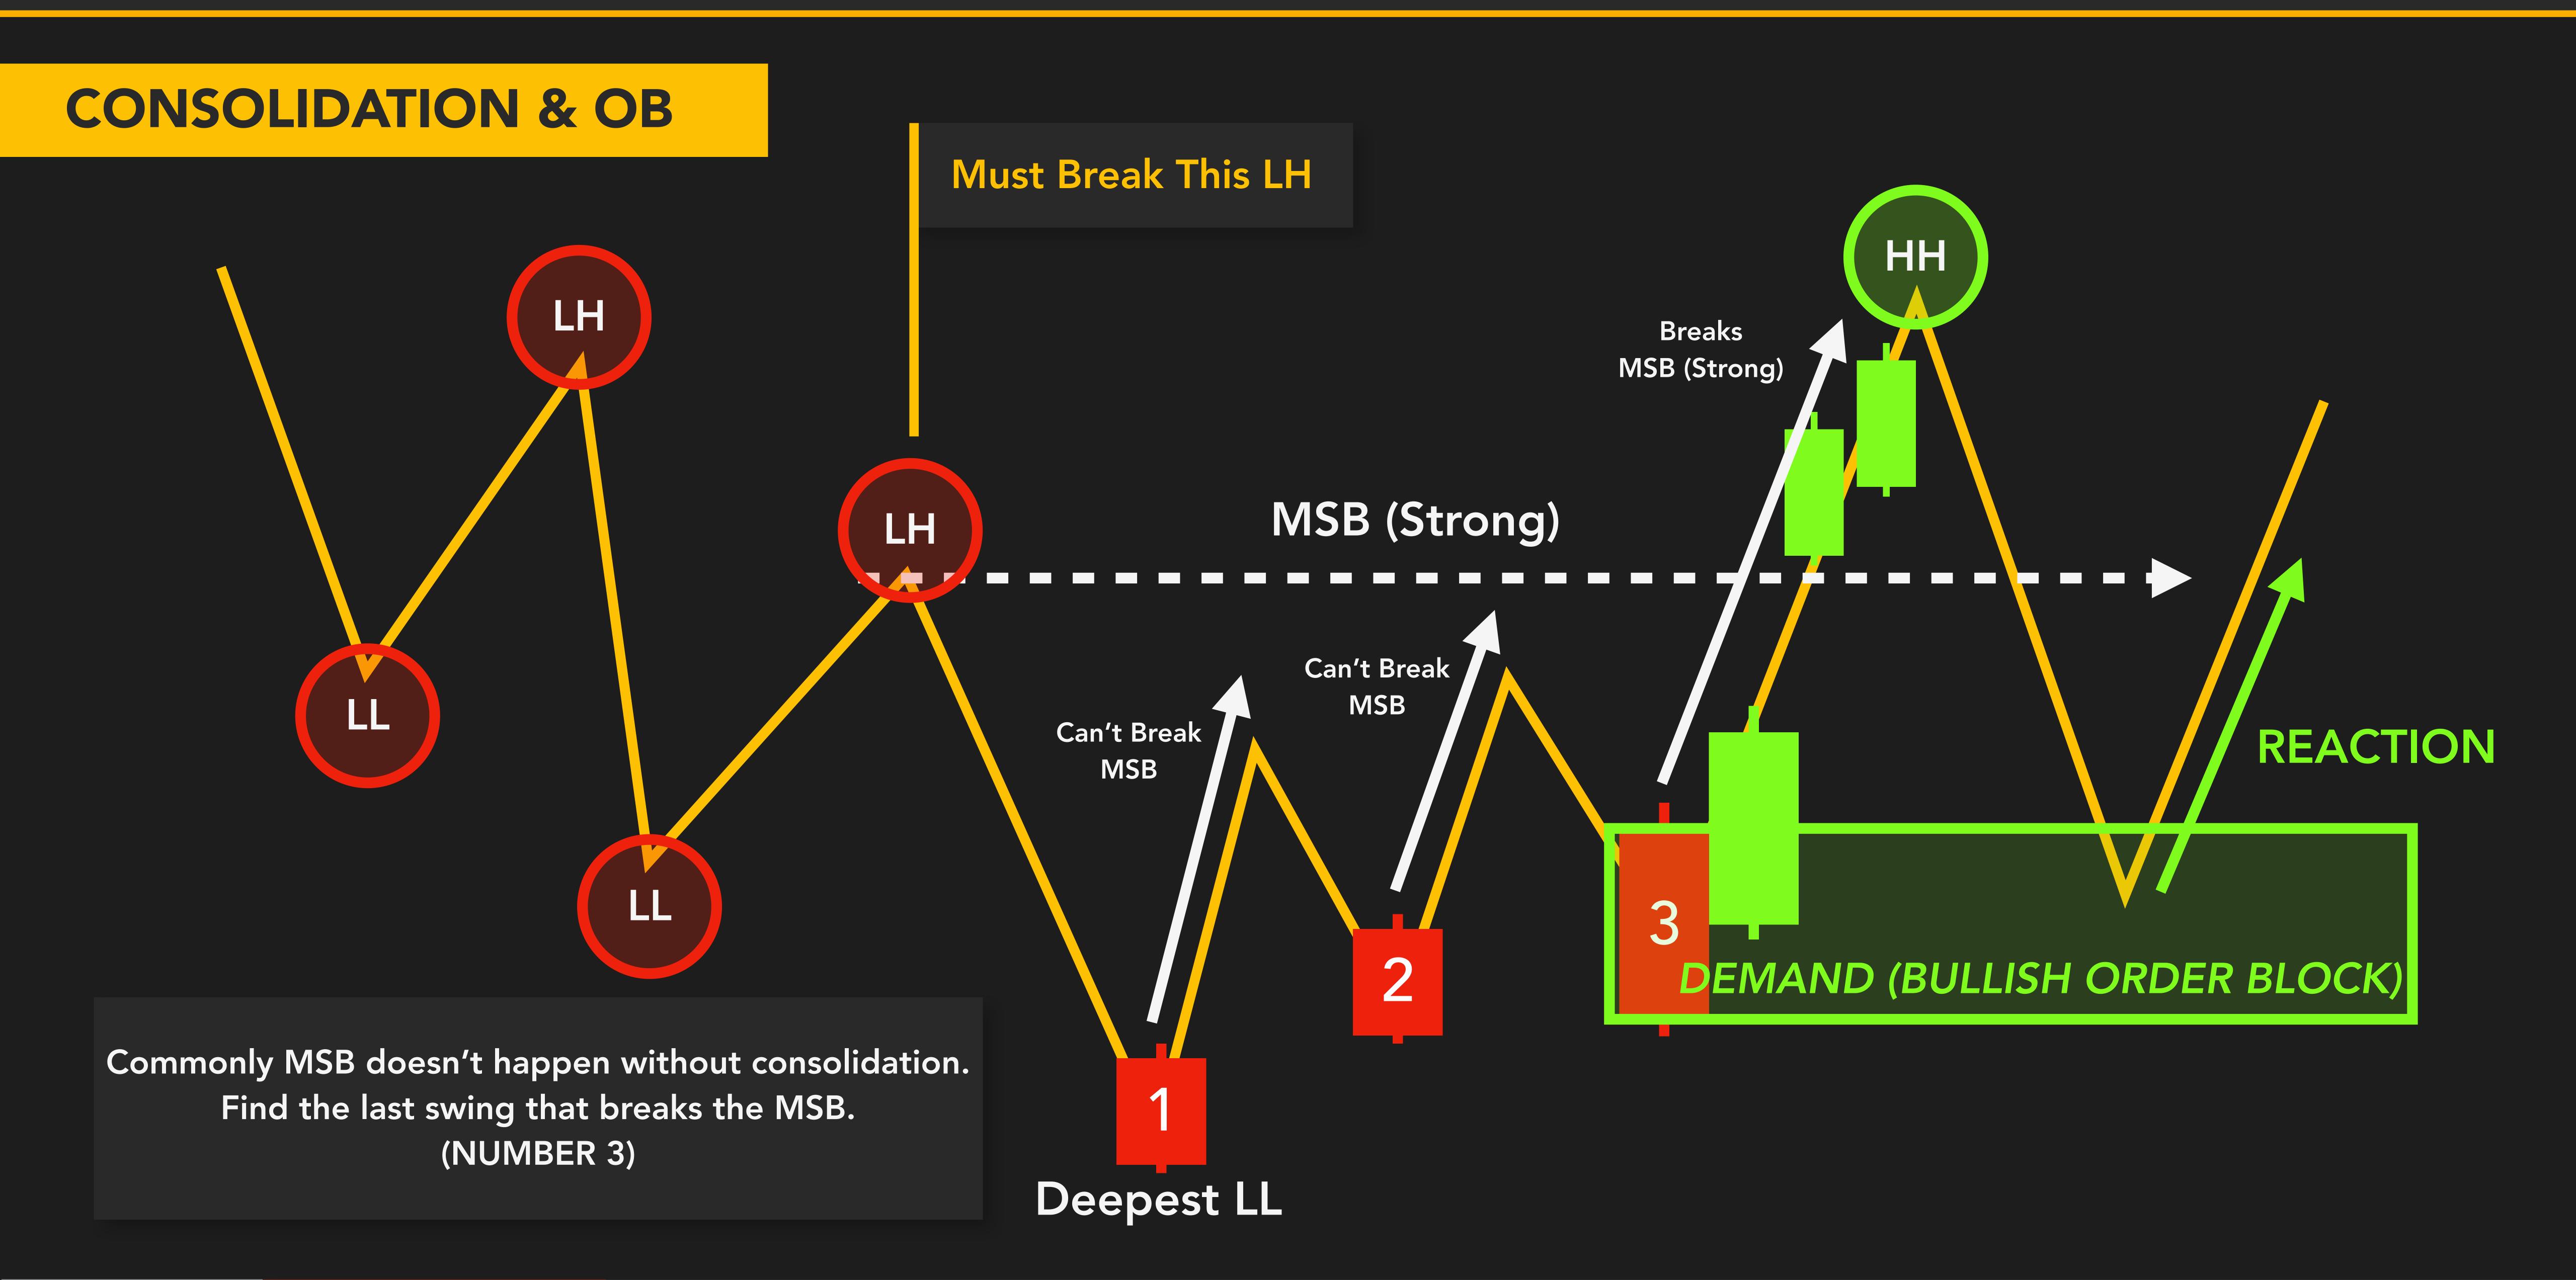

Which swing makes the MSB? So, the last GREEN candlestick starts that swing our demand BEARISH ORDER BLOCK (SUPPLY)

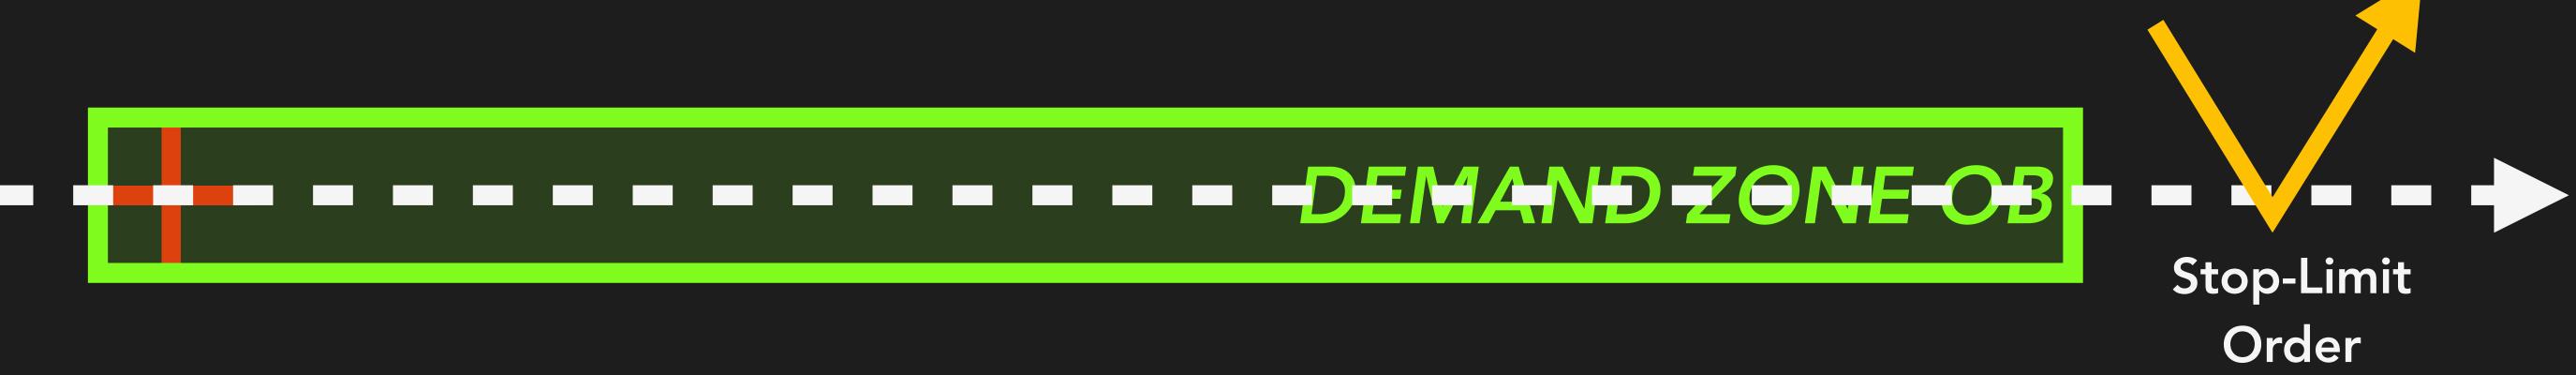

SUPPLY/DEMAND from OB CANDLESTICK

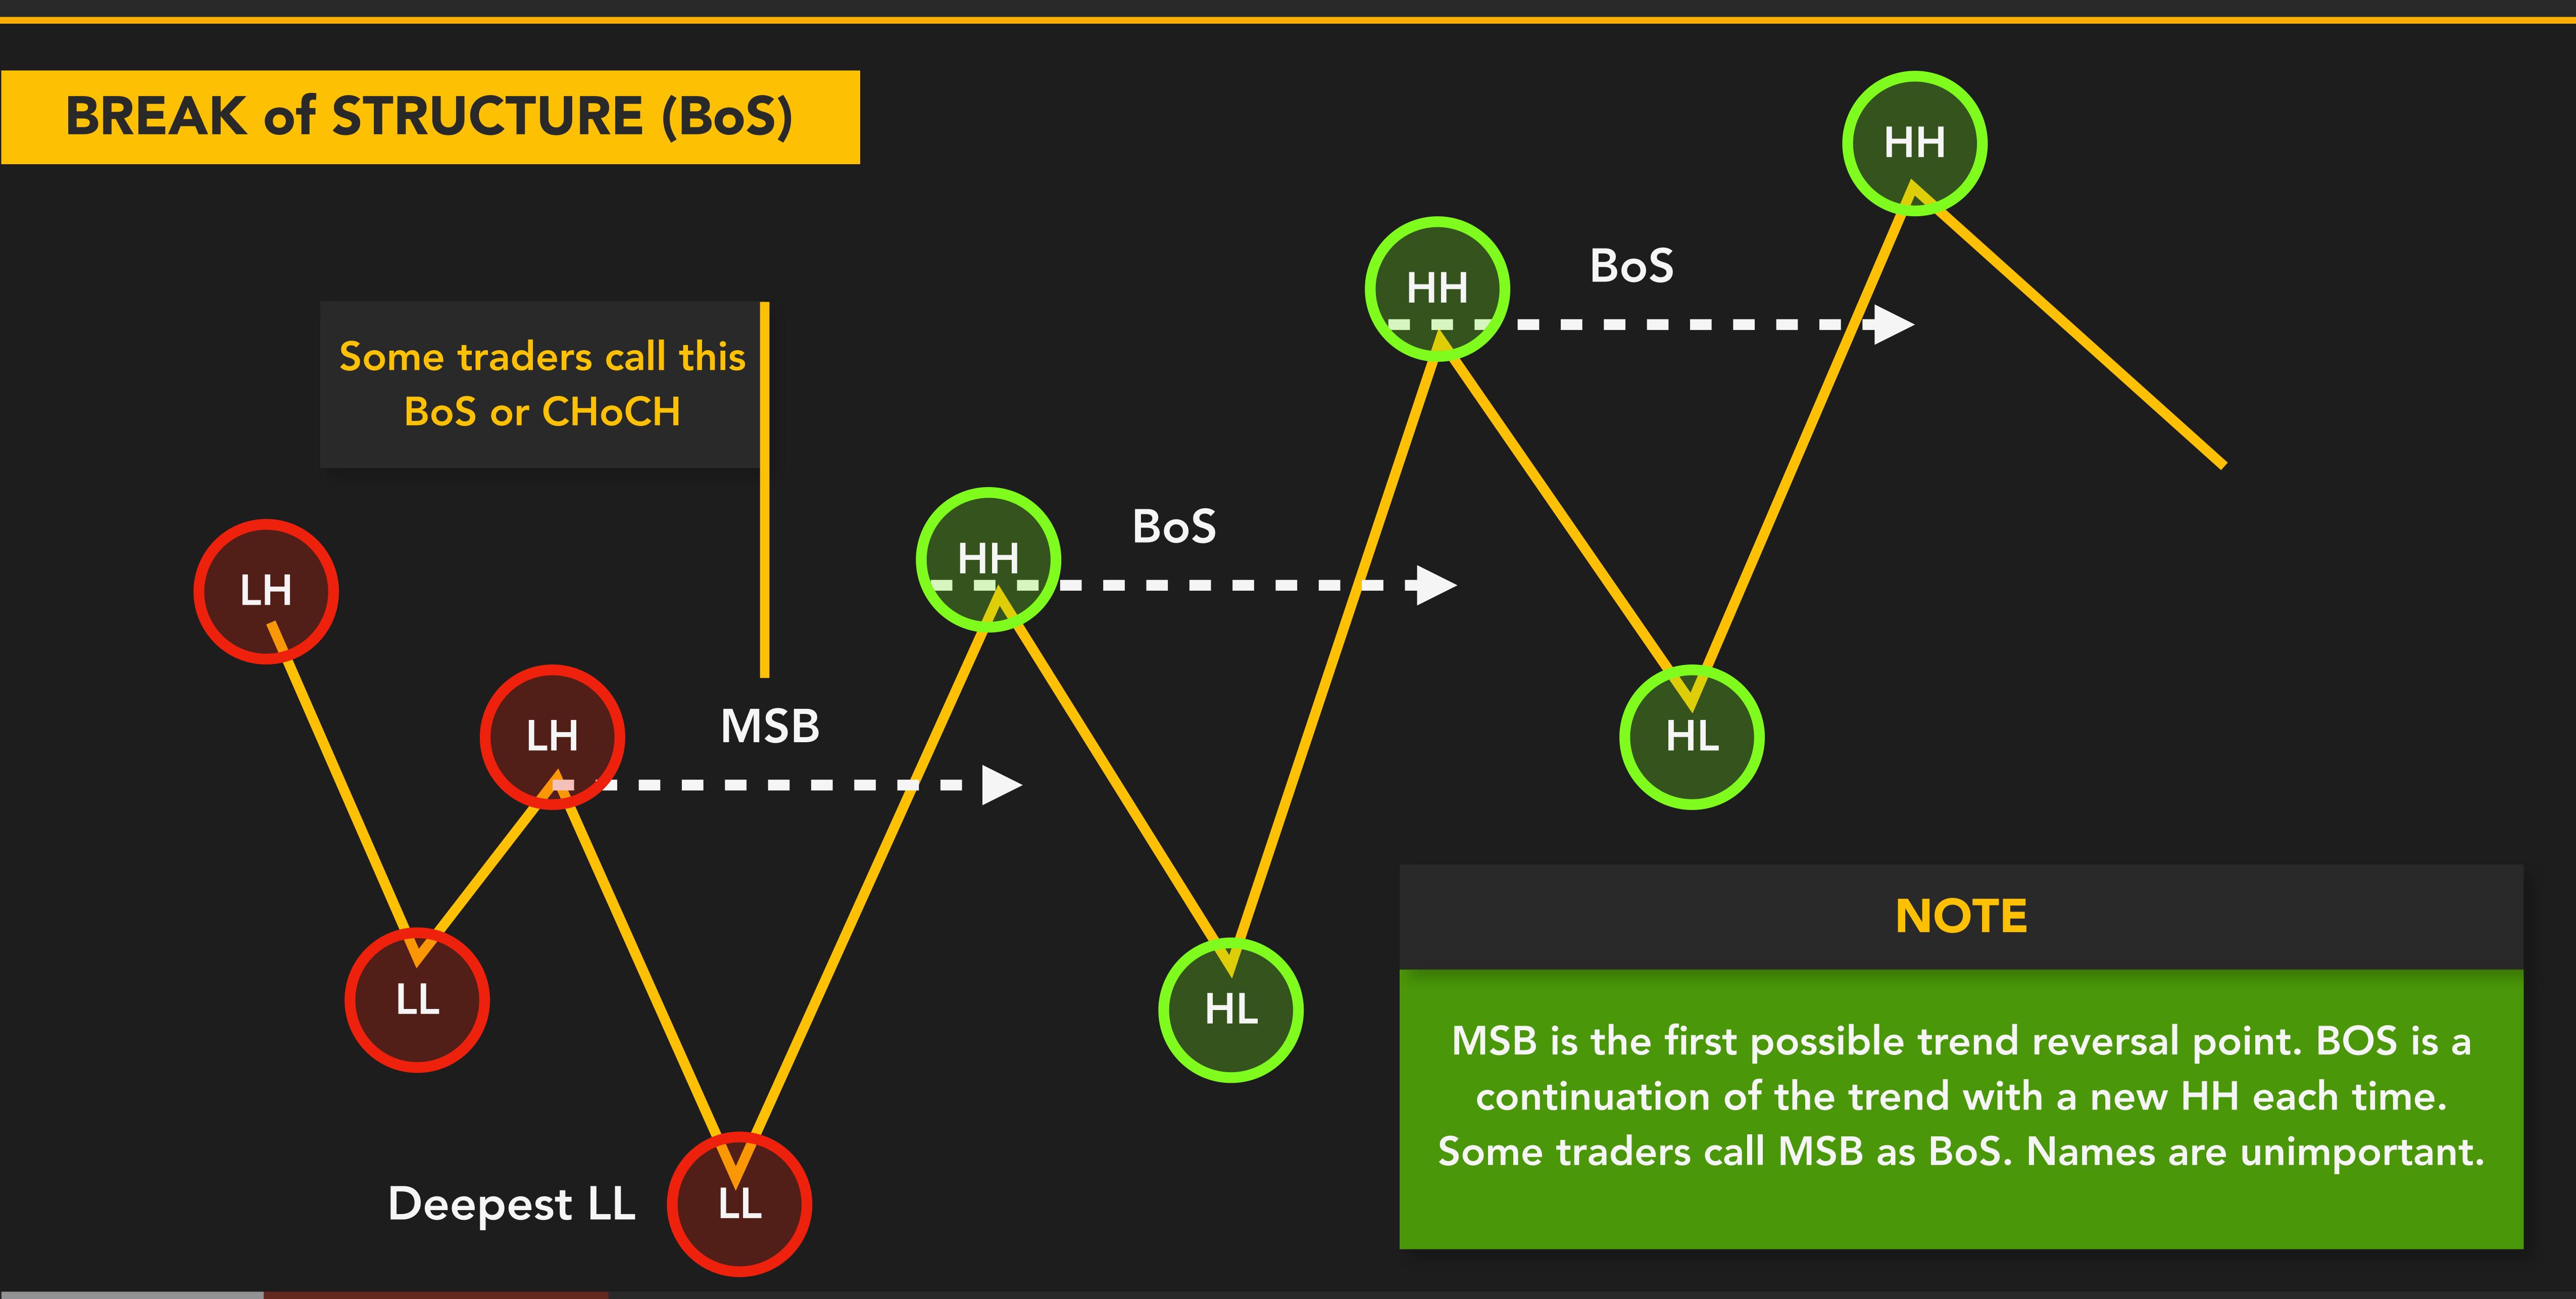

DRAWING SUPPLY / DEMAND

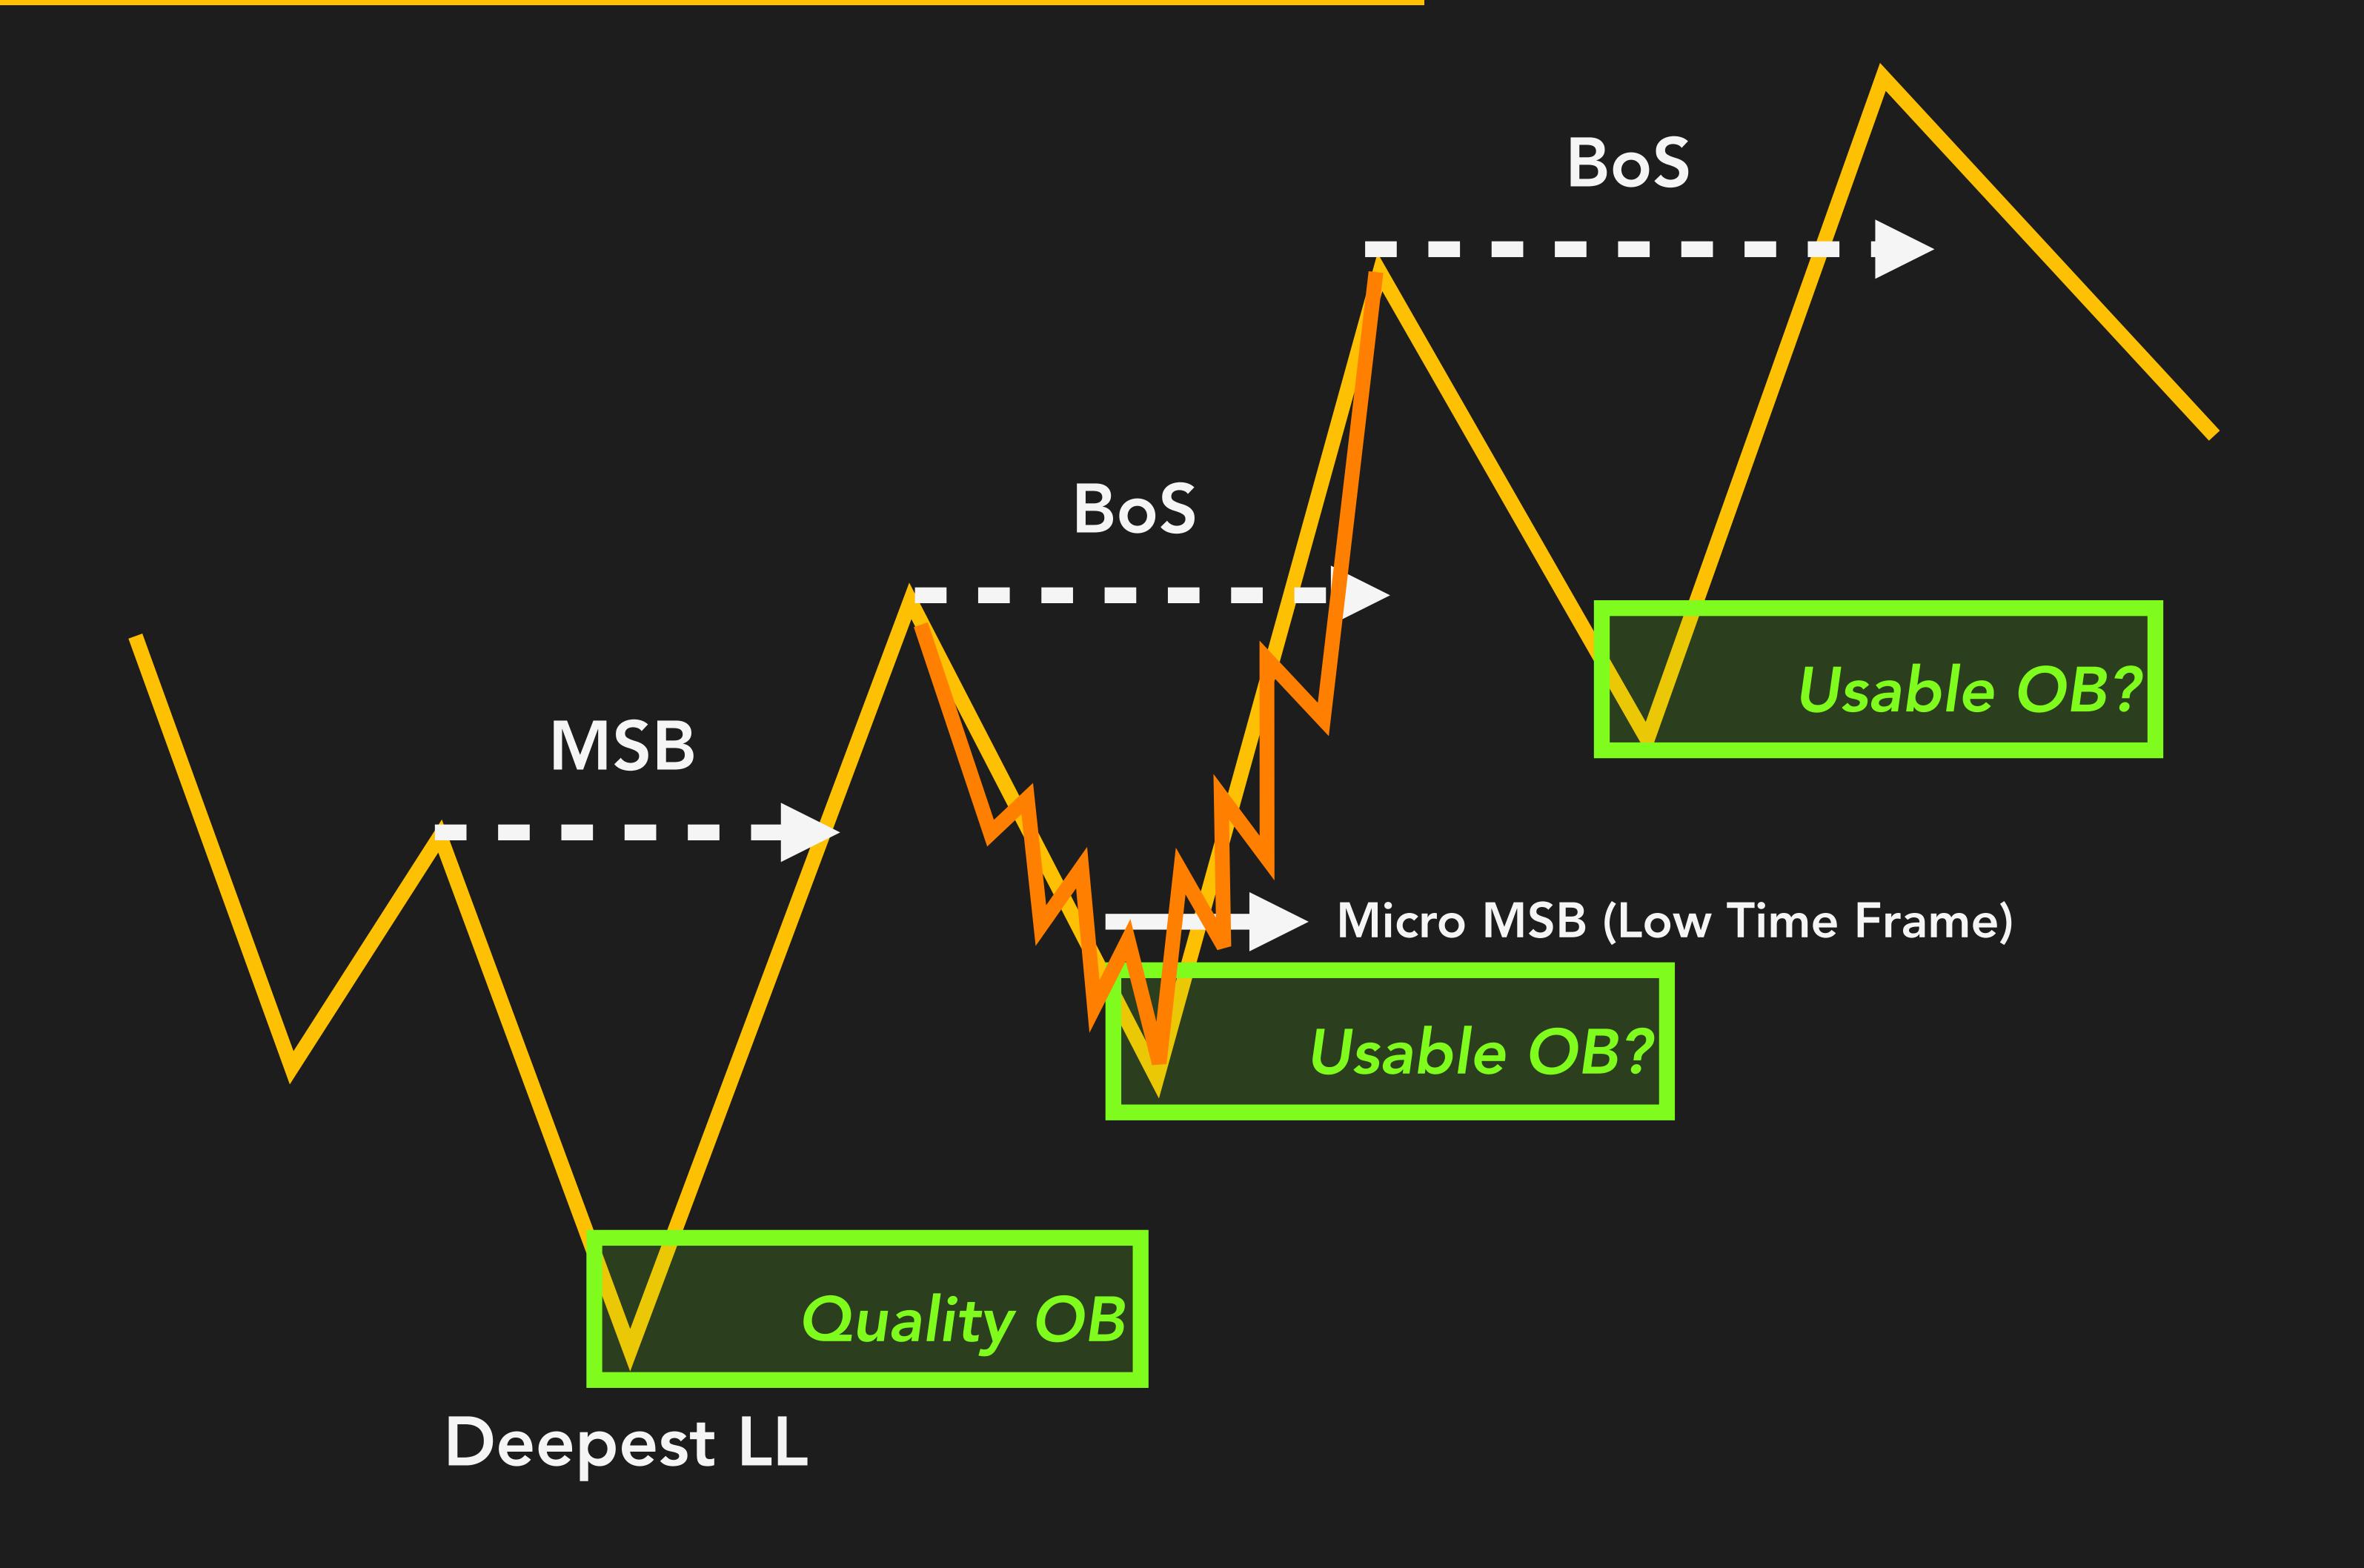

There are no rules about how to draw order block supply/demand zones (Depends on Trader)

The most critical point is the midlevel of the candlestick.

I personally use the body of the candlestick as supply/demand zones. If the body is so small, I also take the wicks.

ORDER BLOCK? (BoS CREATOR)

ORDER BLOCK or NOT? (BoS CREATORS)

Seen so many traders that use BoS to identify Order Blocks

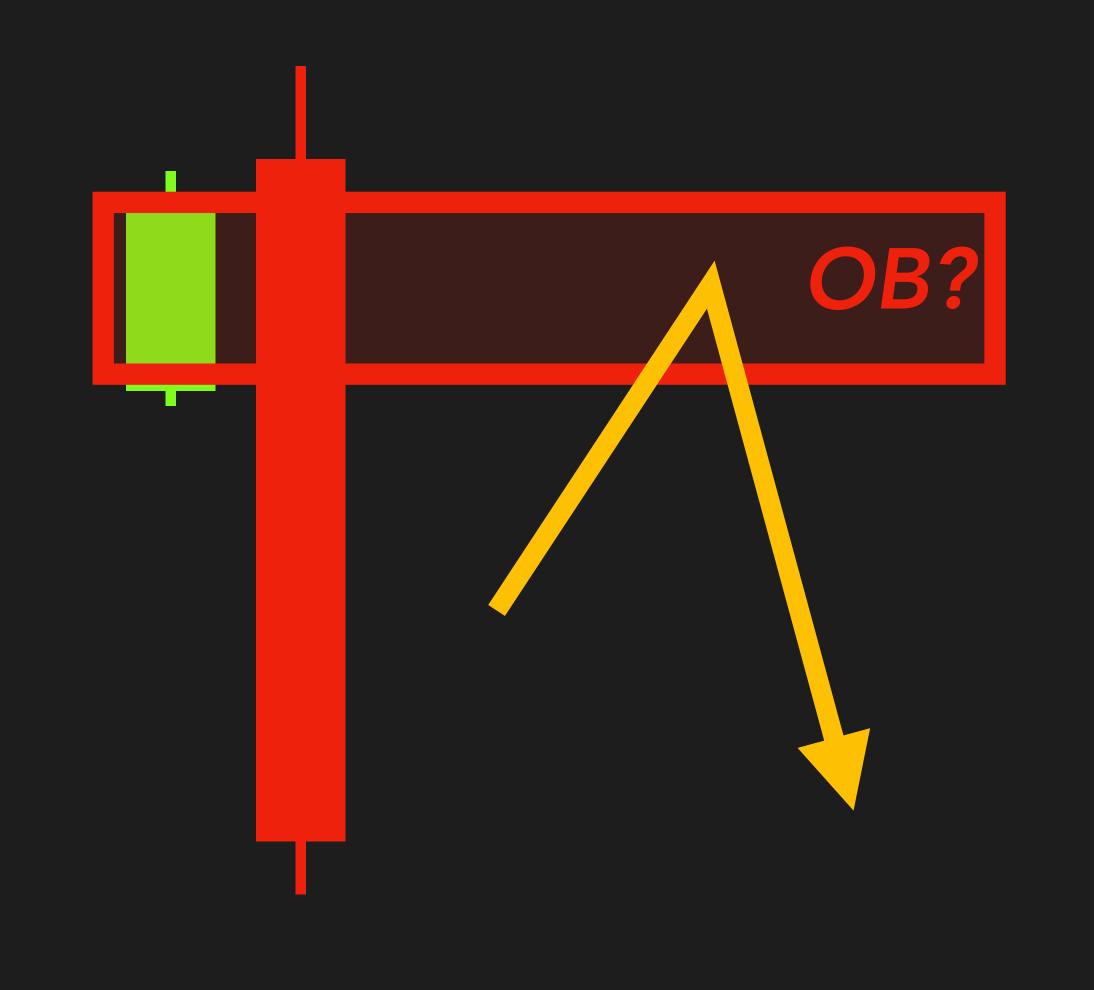

Actually, every swing point has a micro MSB in lower time frames.

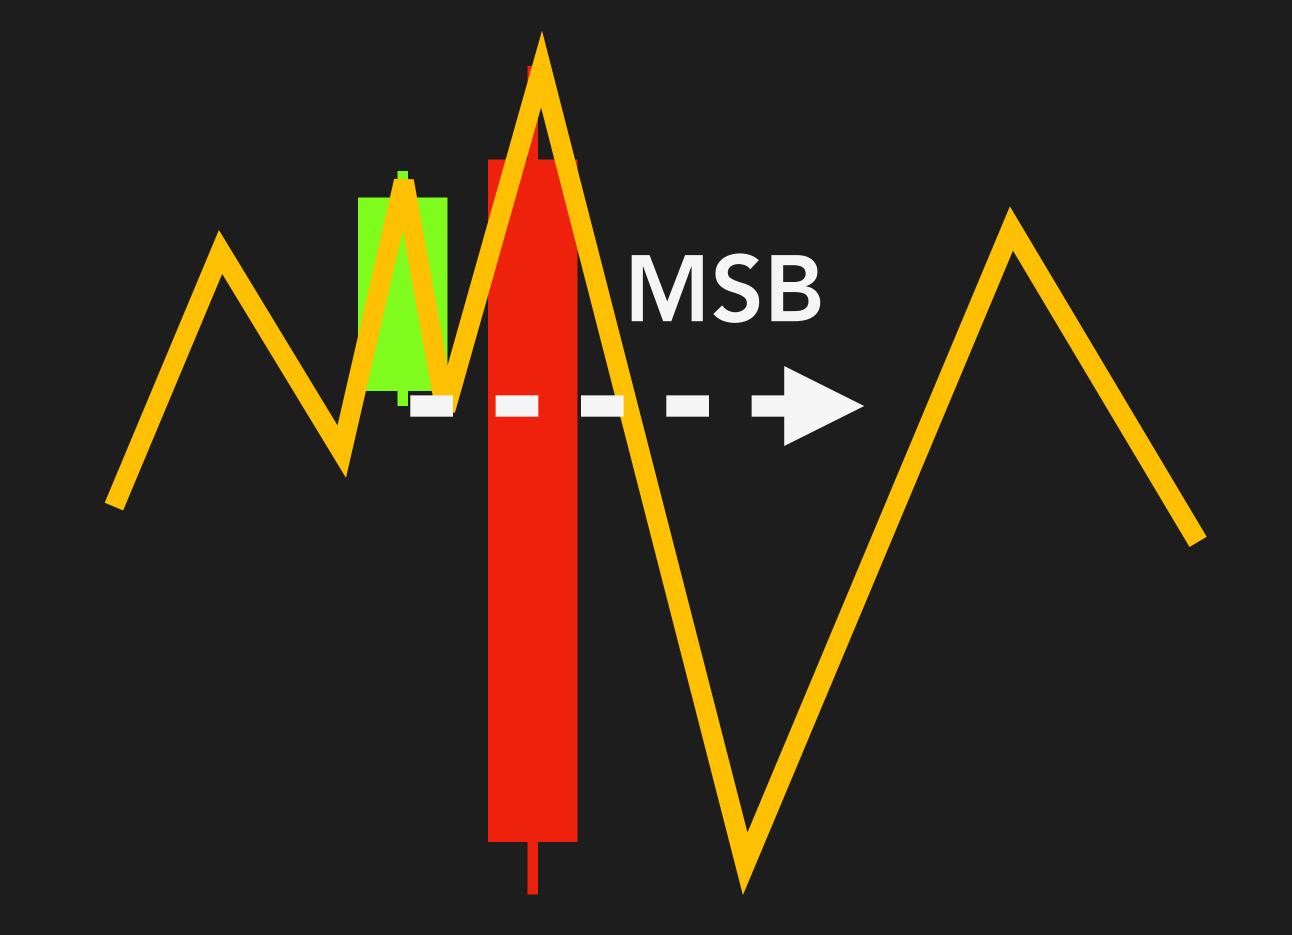

The question is which Order Blocks are tradable?

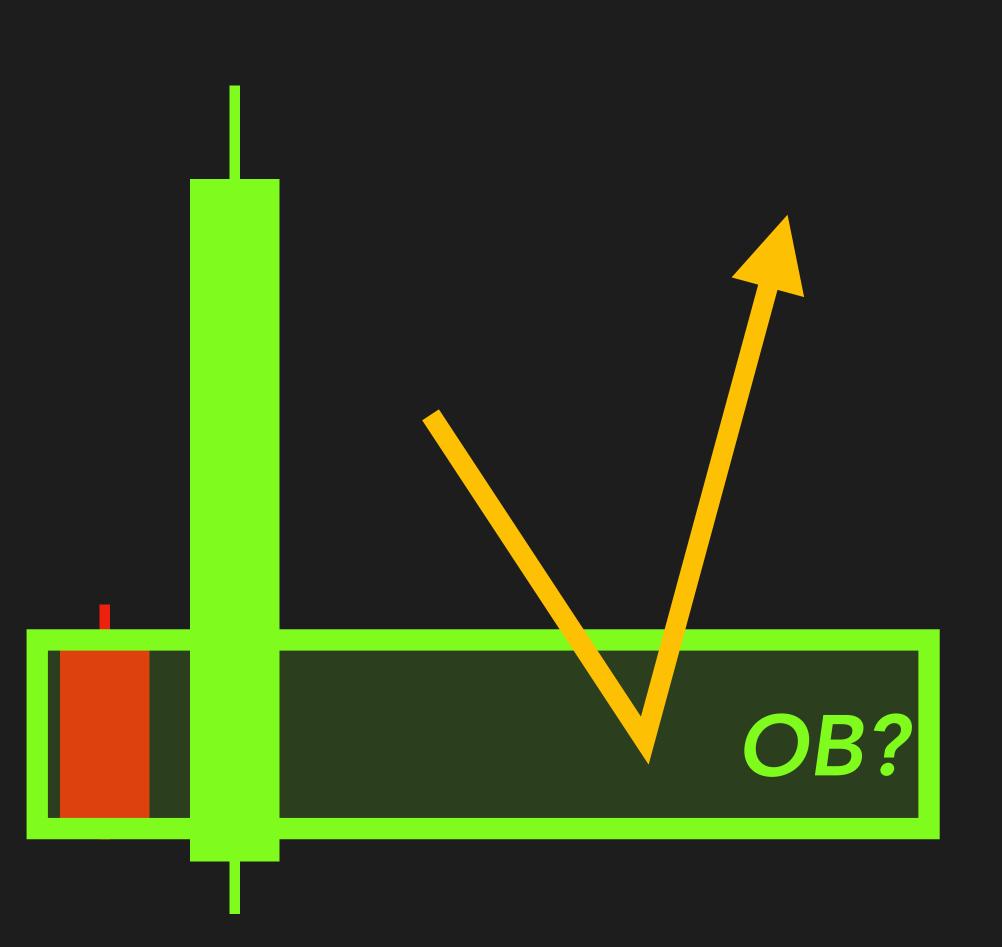

Depends on Key Levels, Support, Resistance, Imbalances, candlestick patterns, etc...

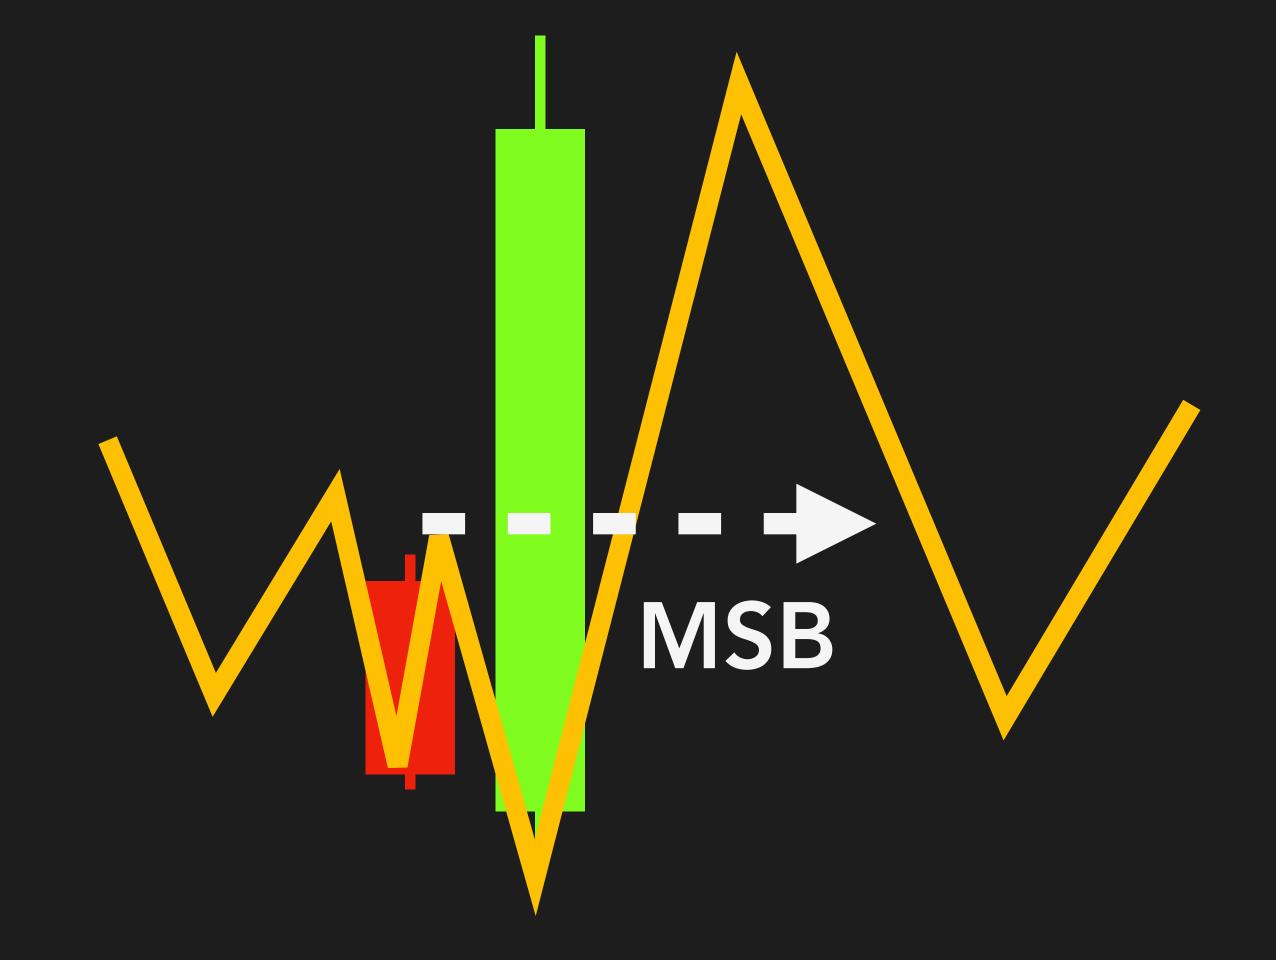

ORDER BLOCK? (ENGULFING PATTERN)

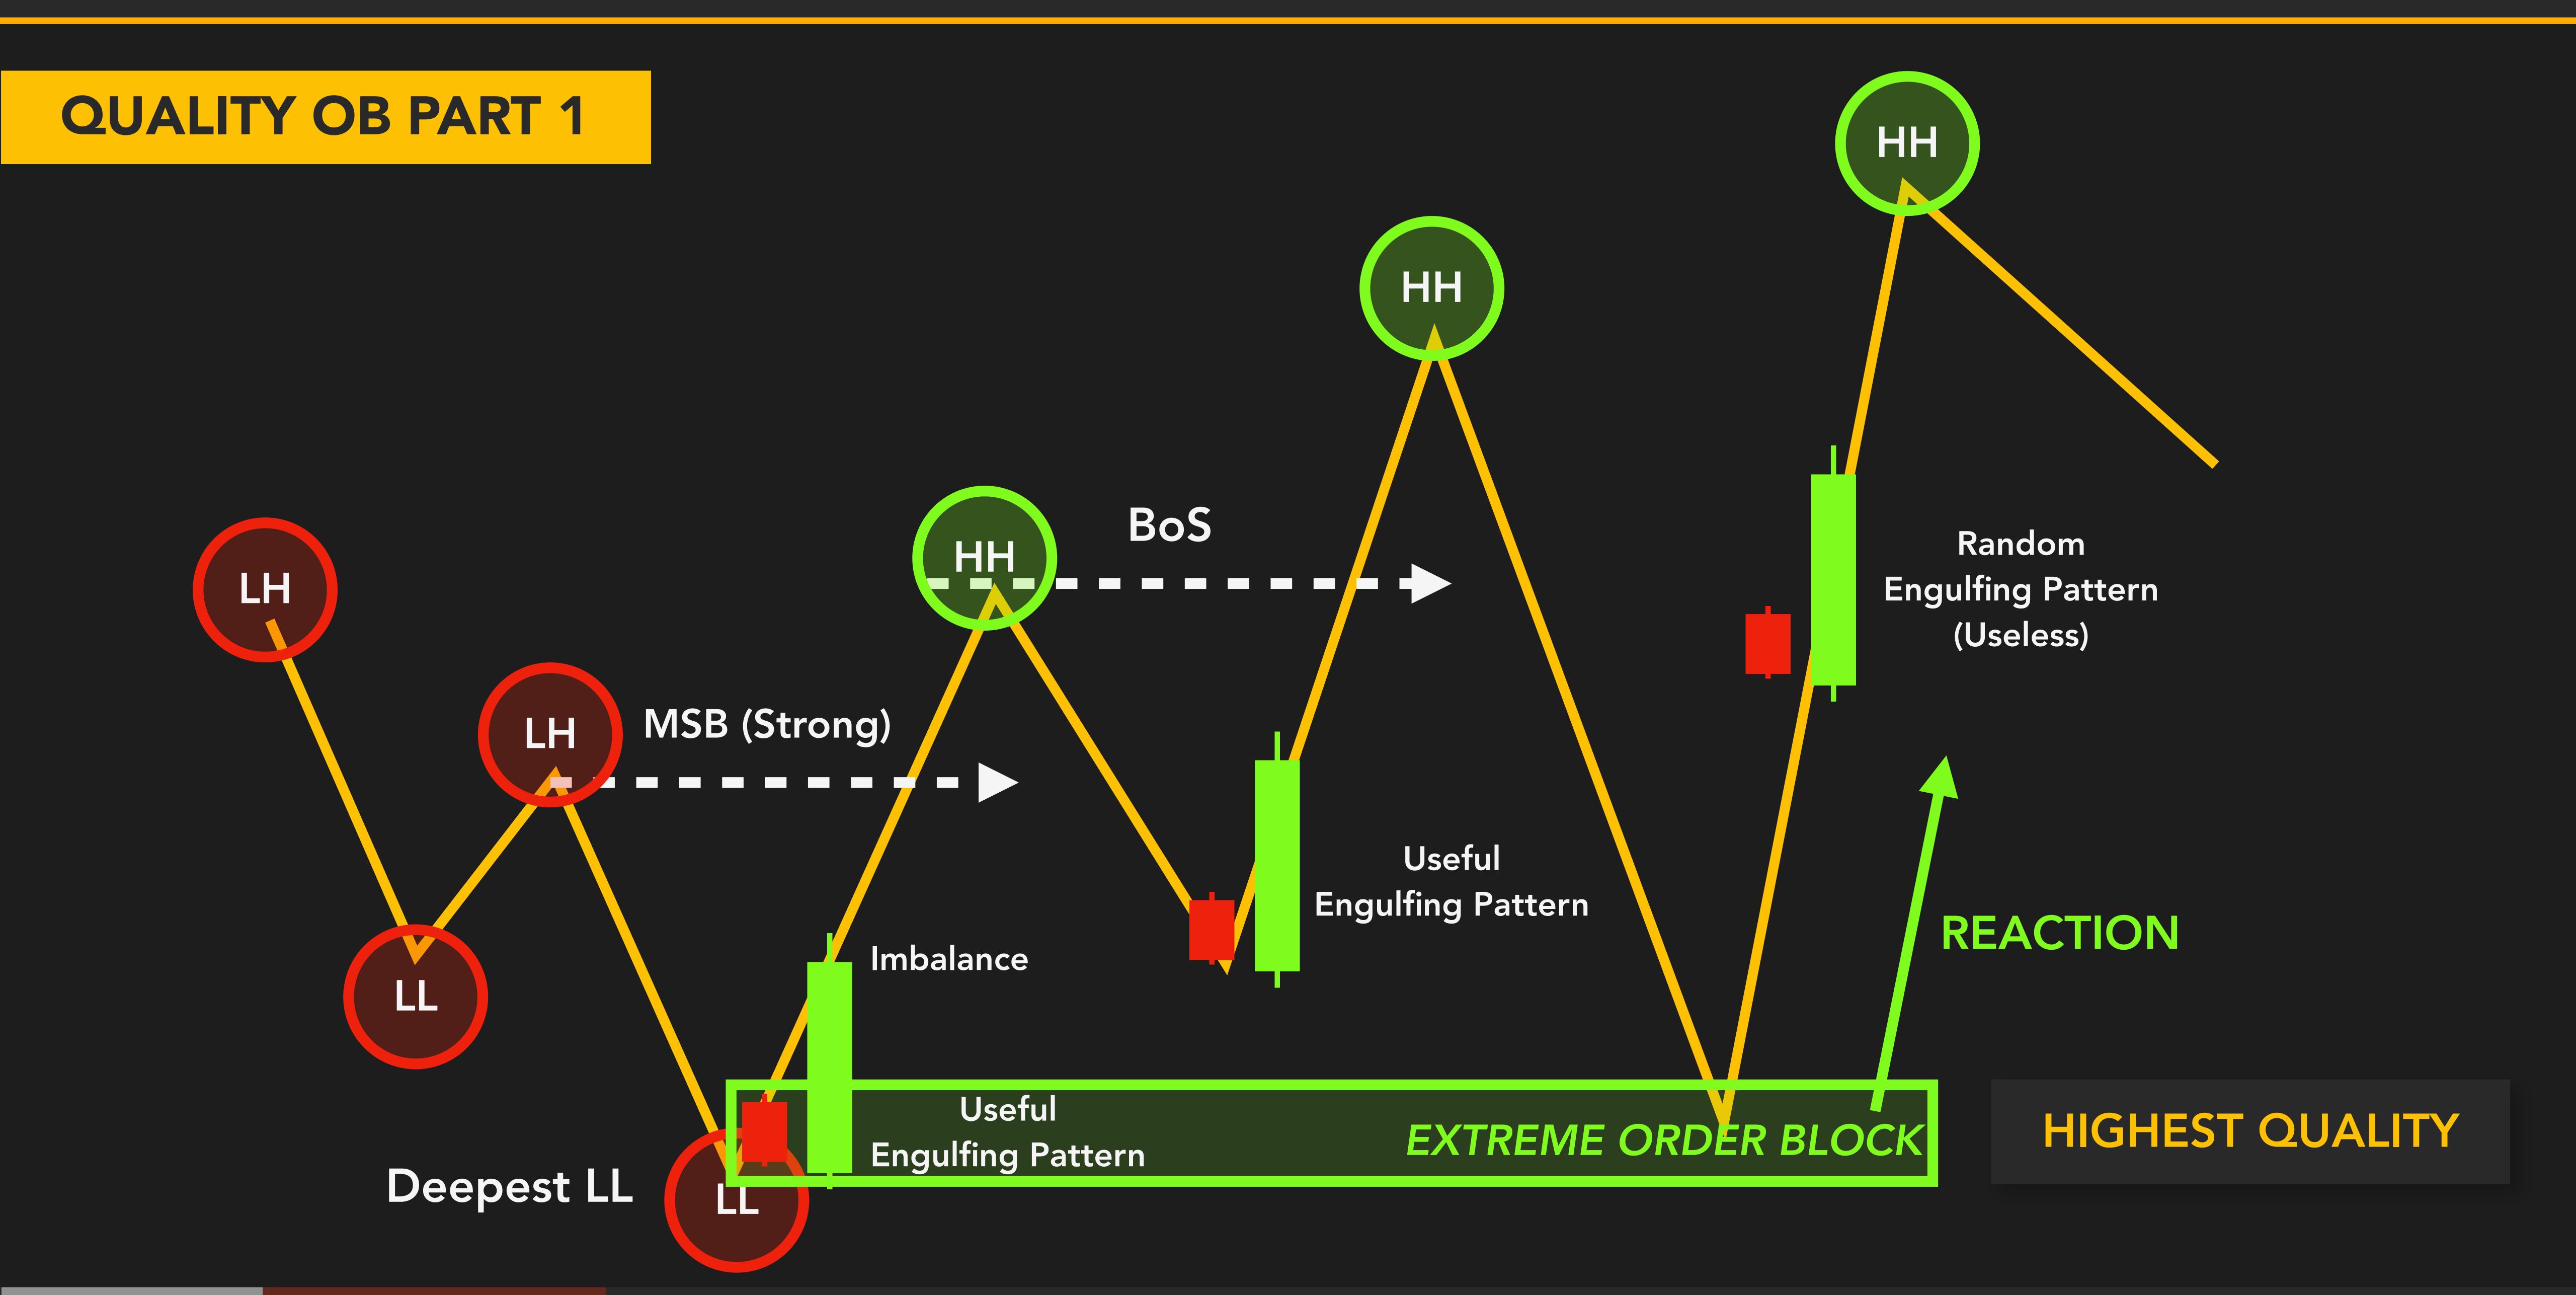

ORDER BLOCK or NOT? (ENGULFING PATTERN)

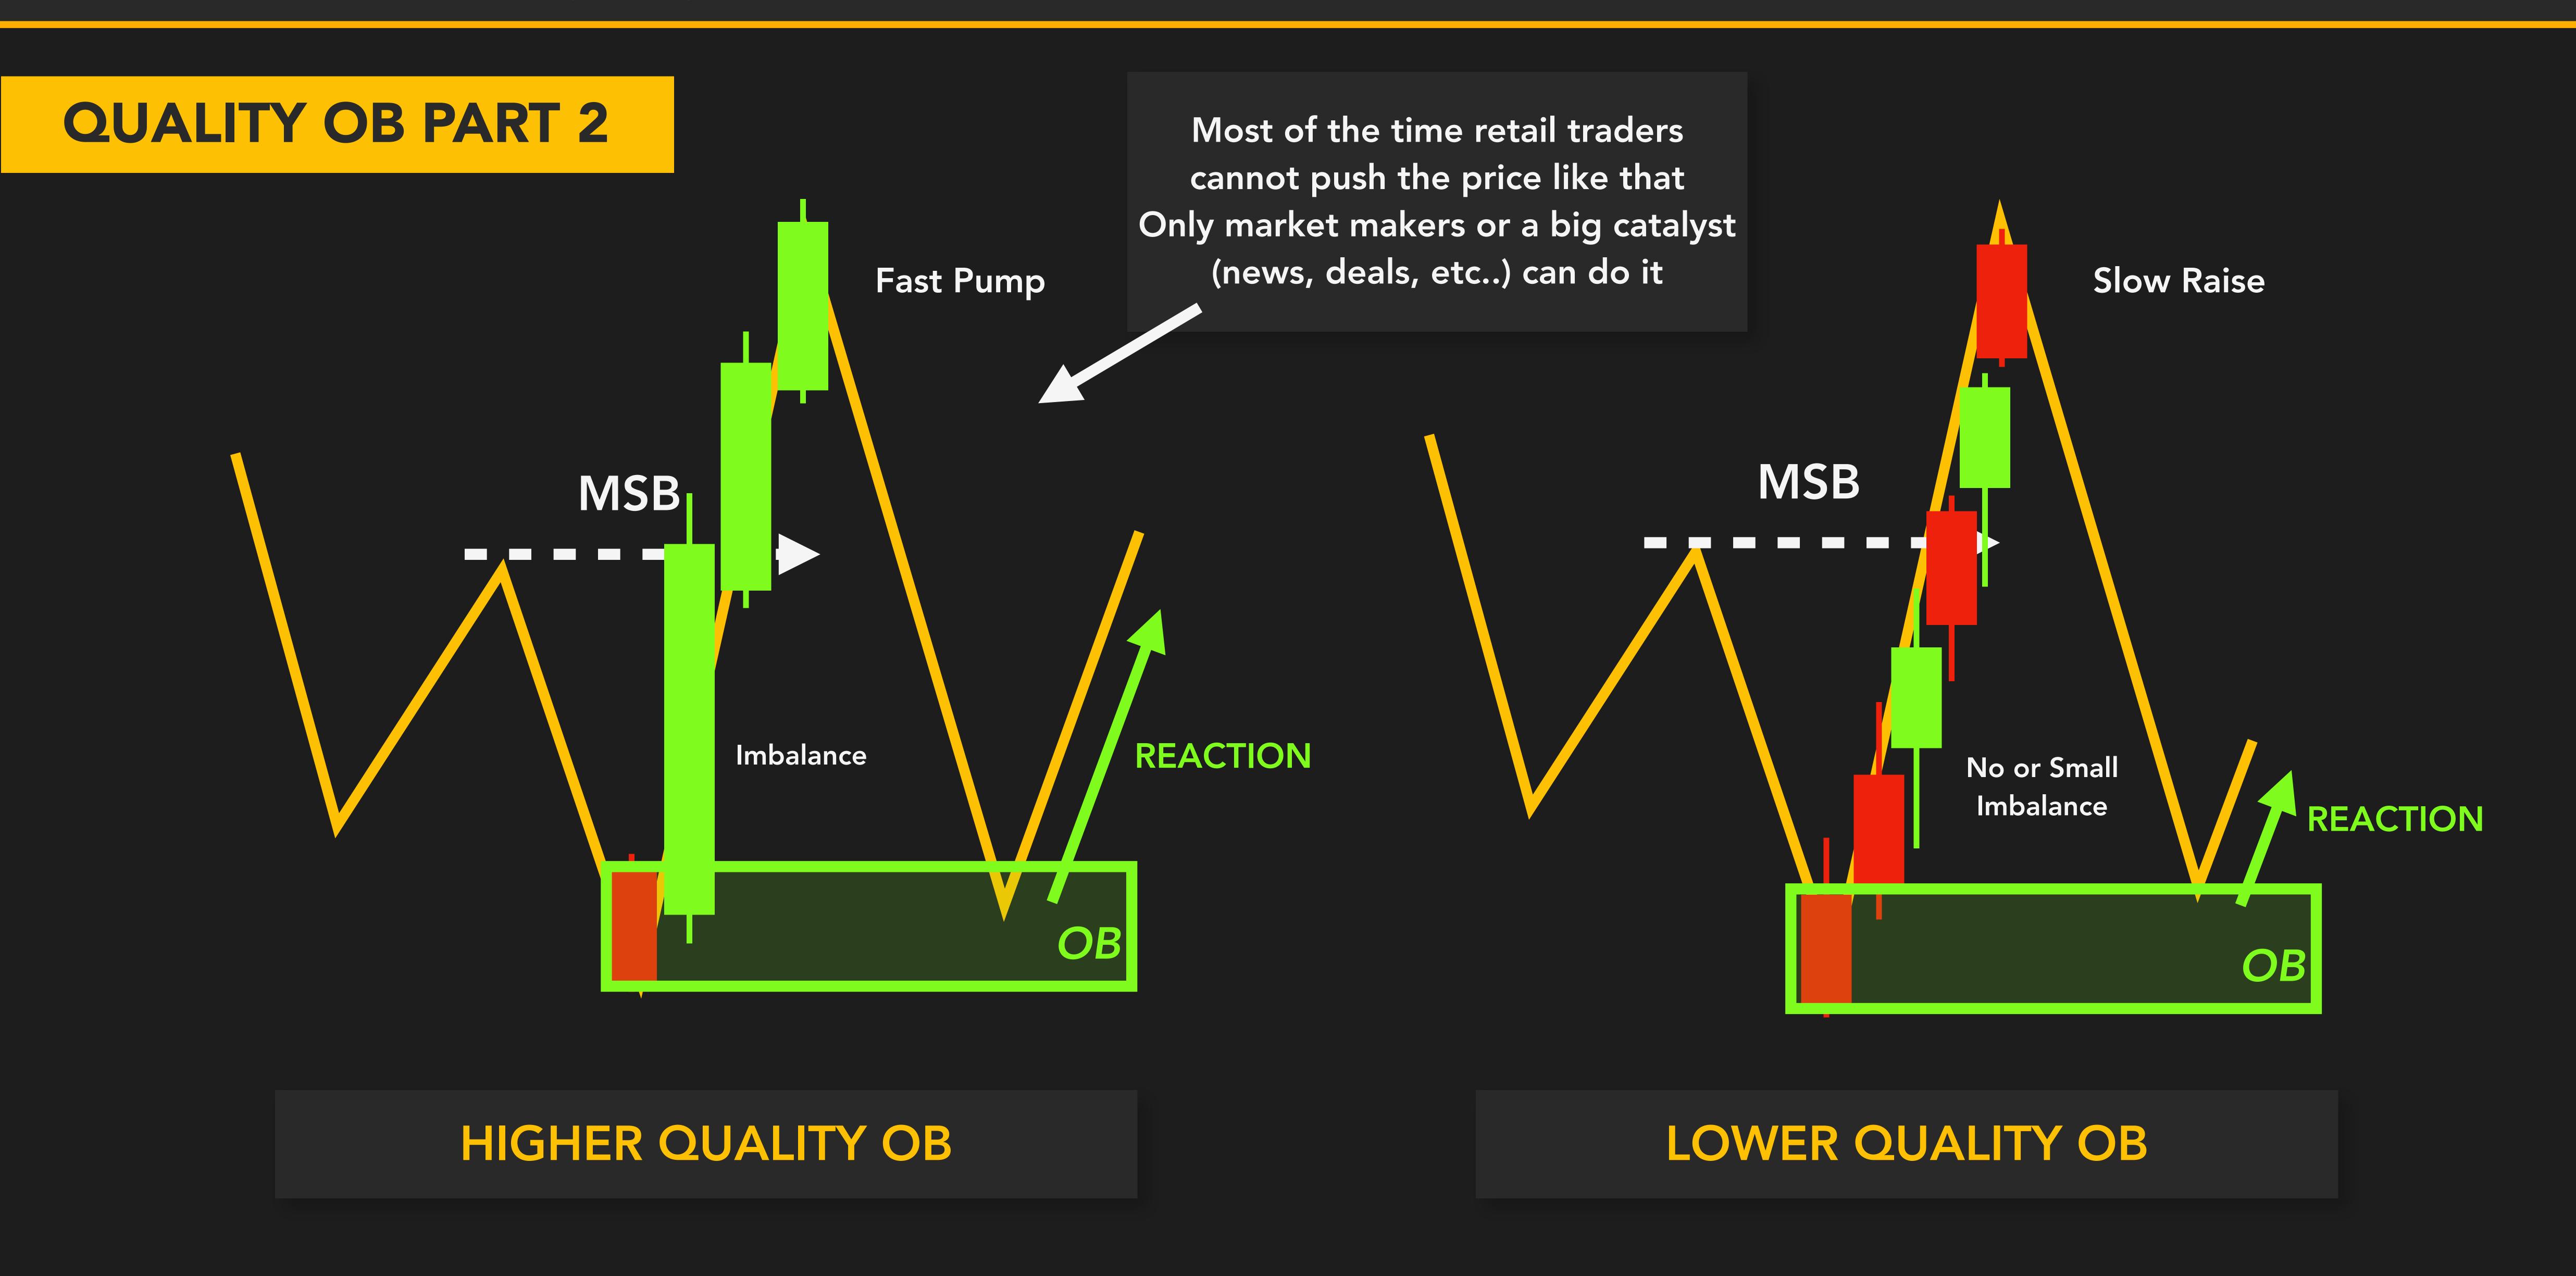

Seen so many traders that use Engulfing Pattern as Order Blocks

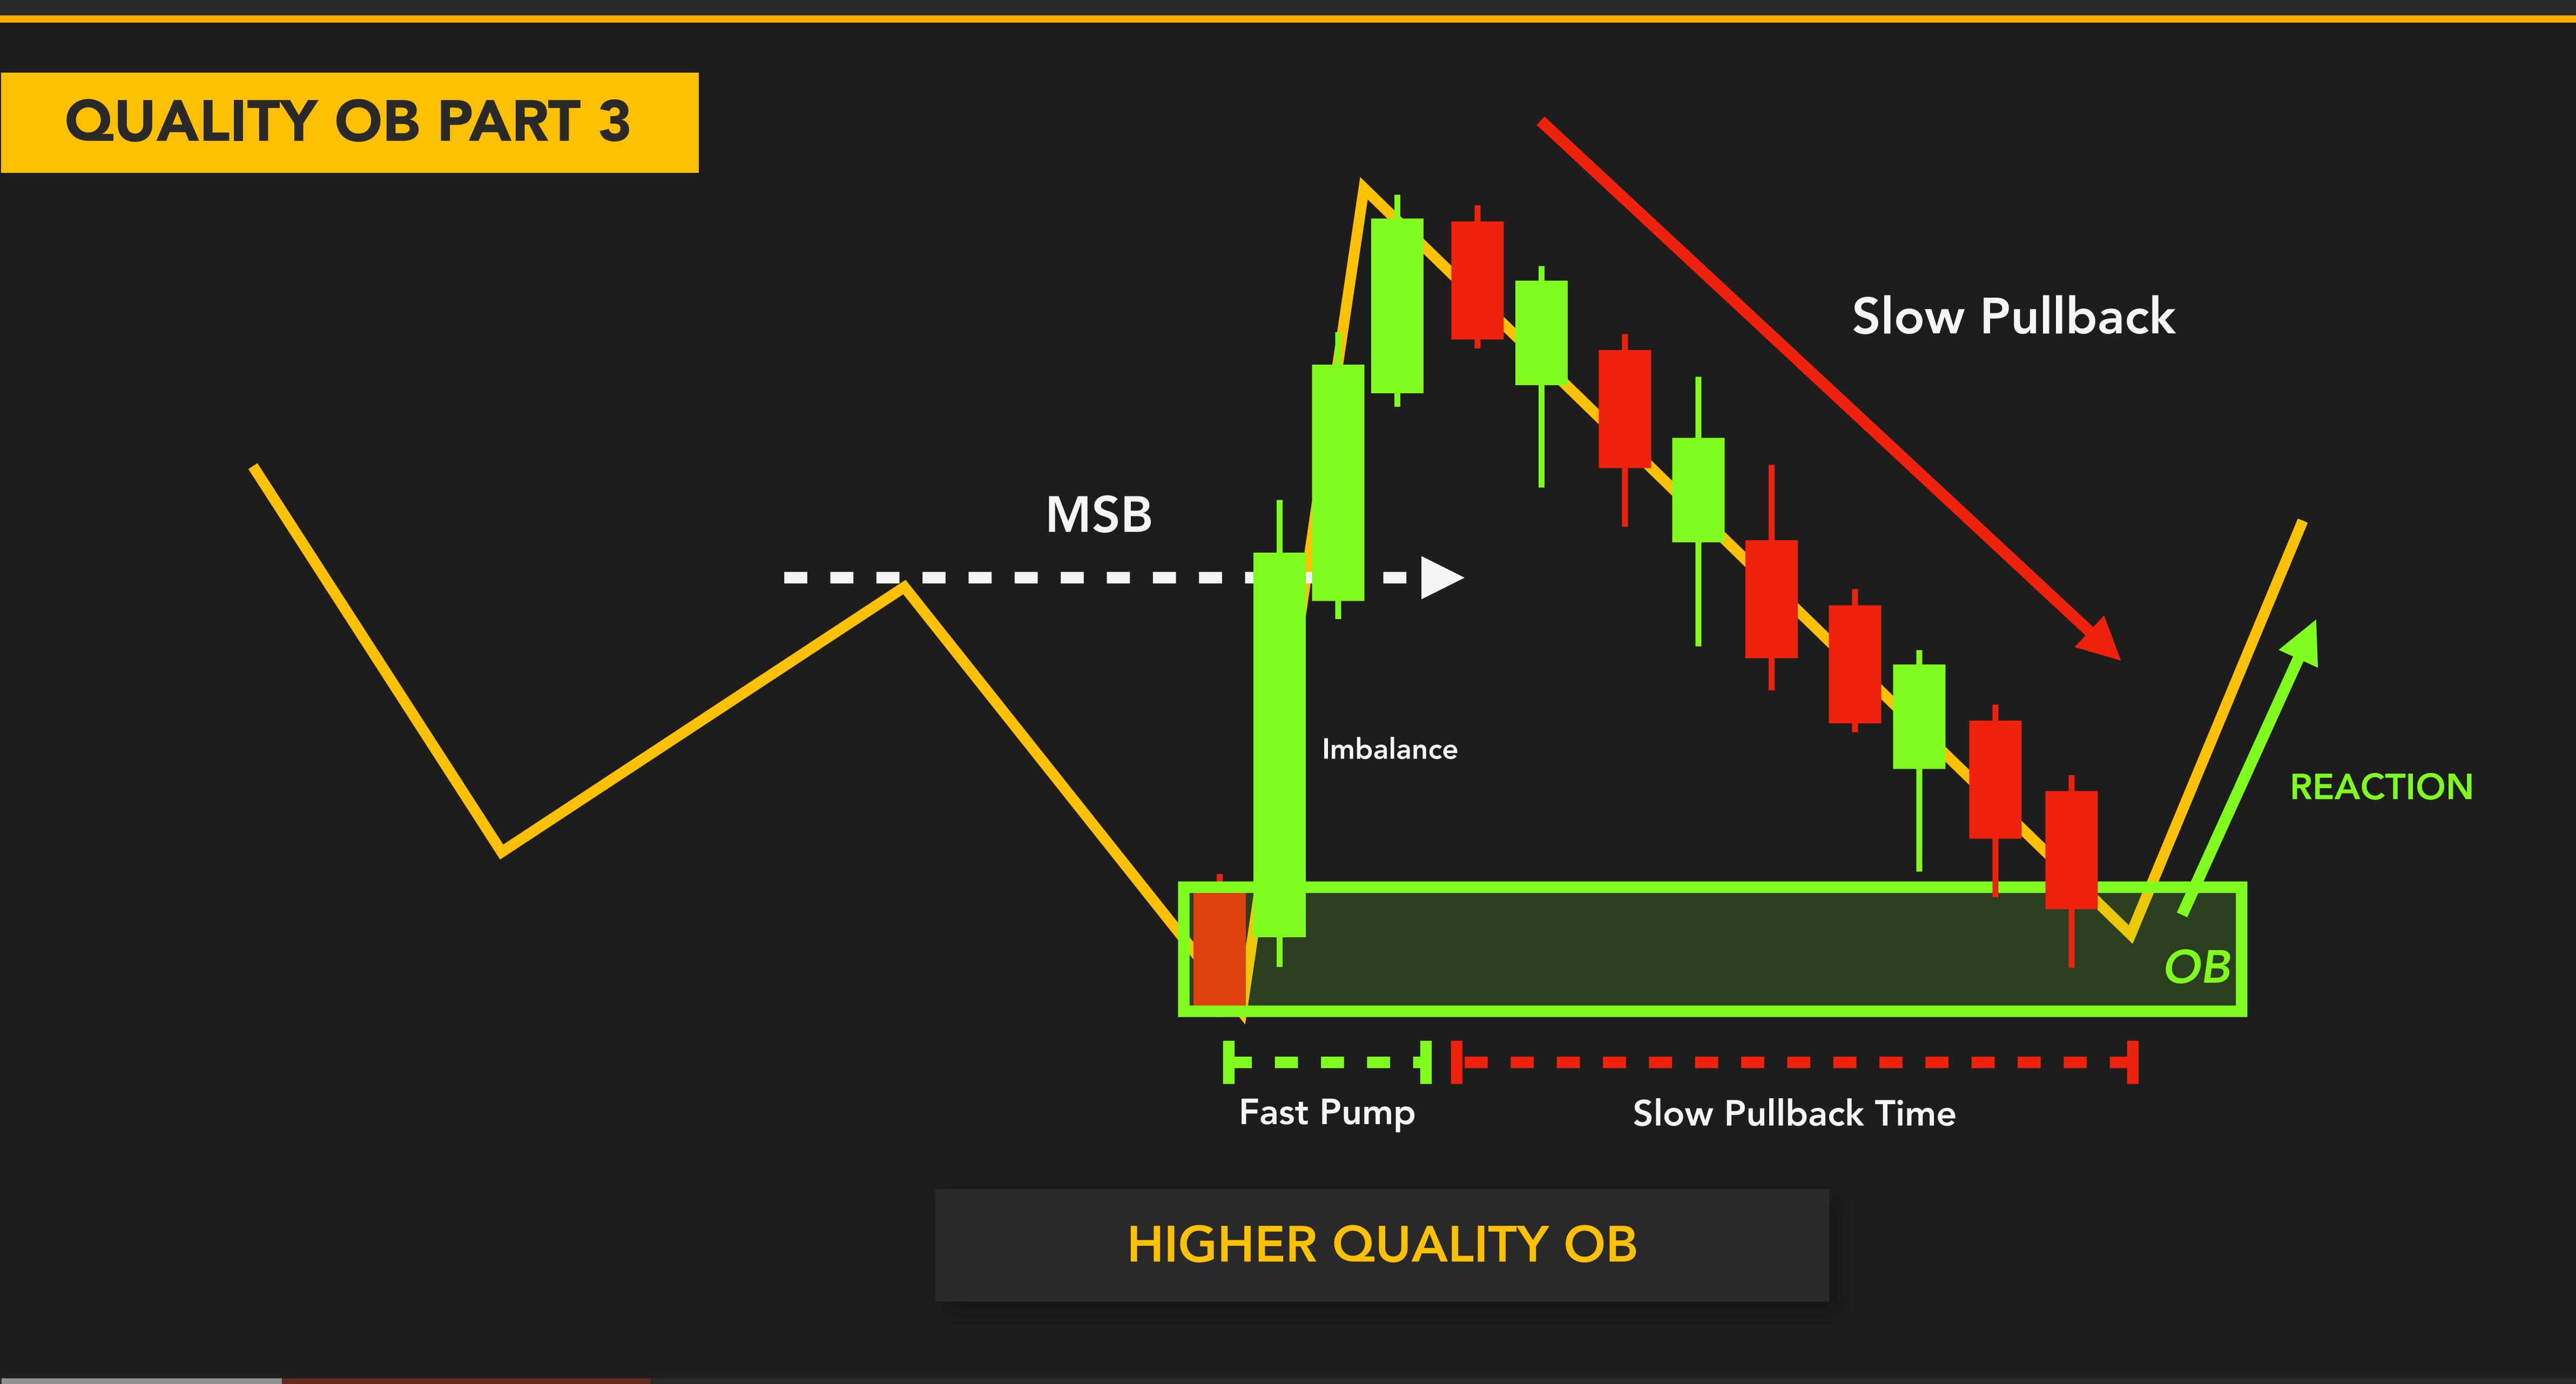

But Engulfing Pattern is everywhere

We cannot consider them quality OB unless there at significant price levels such as swing points (creating BoS or MSB), key levels (High, Low), support/resistance etc.

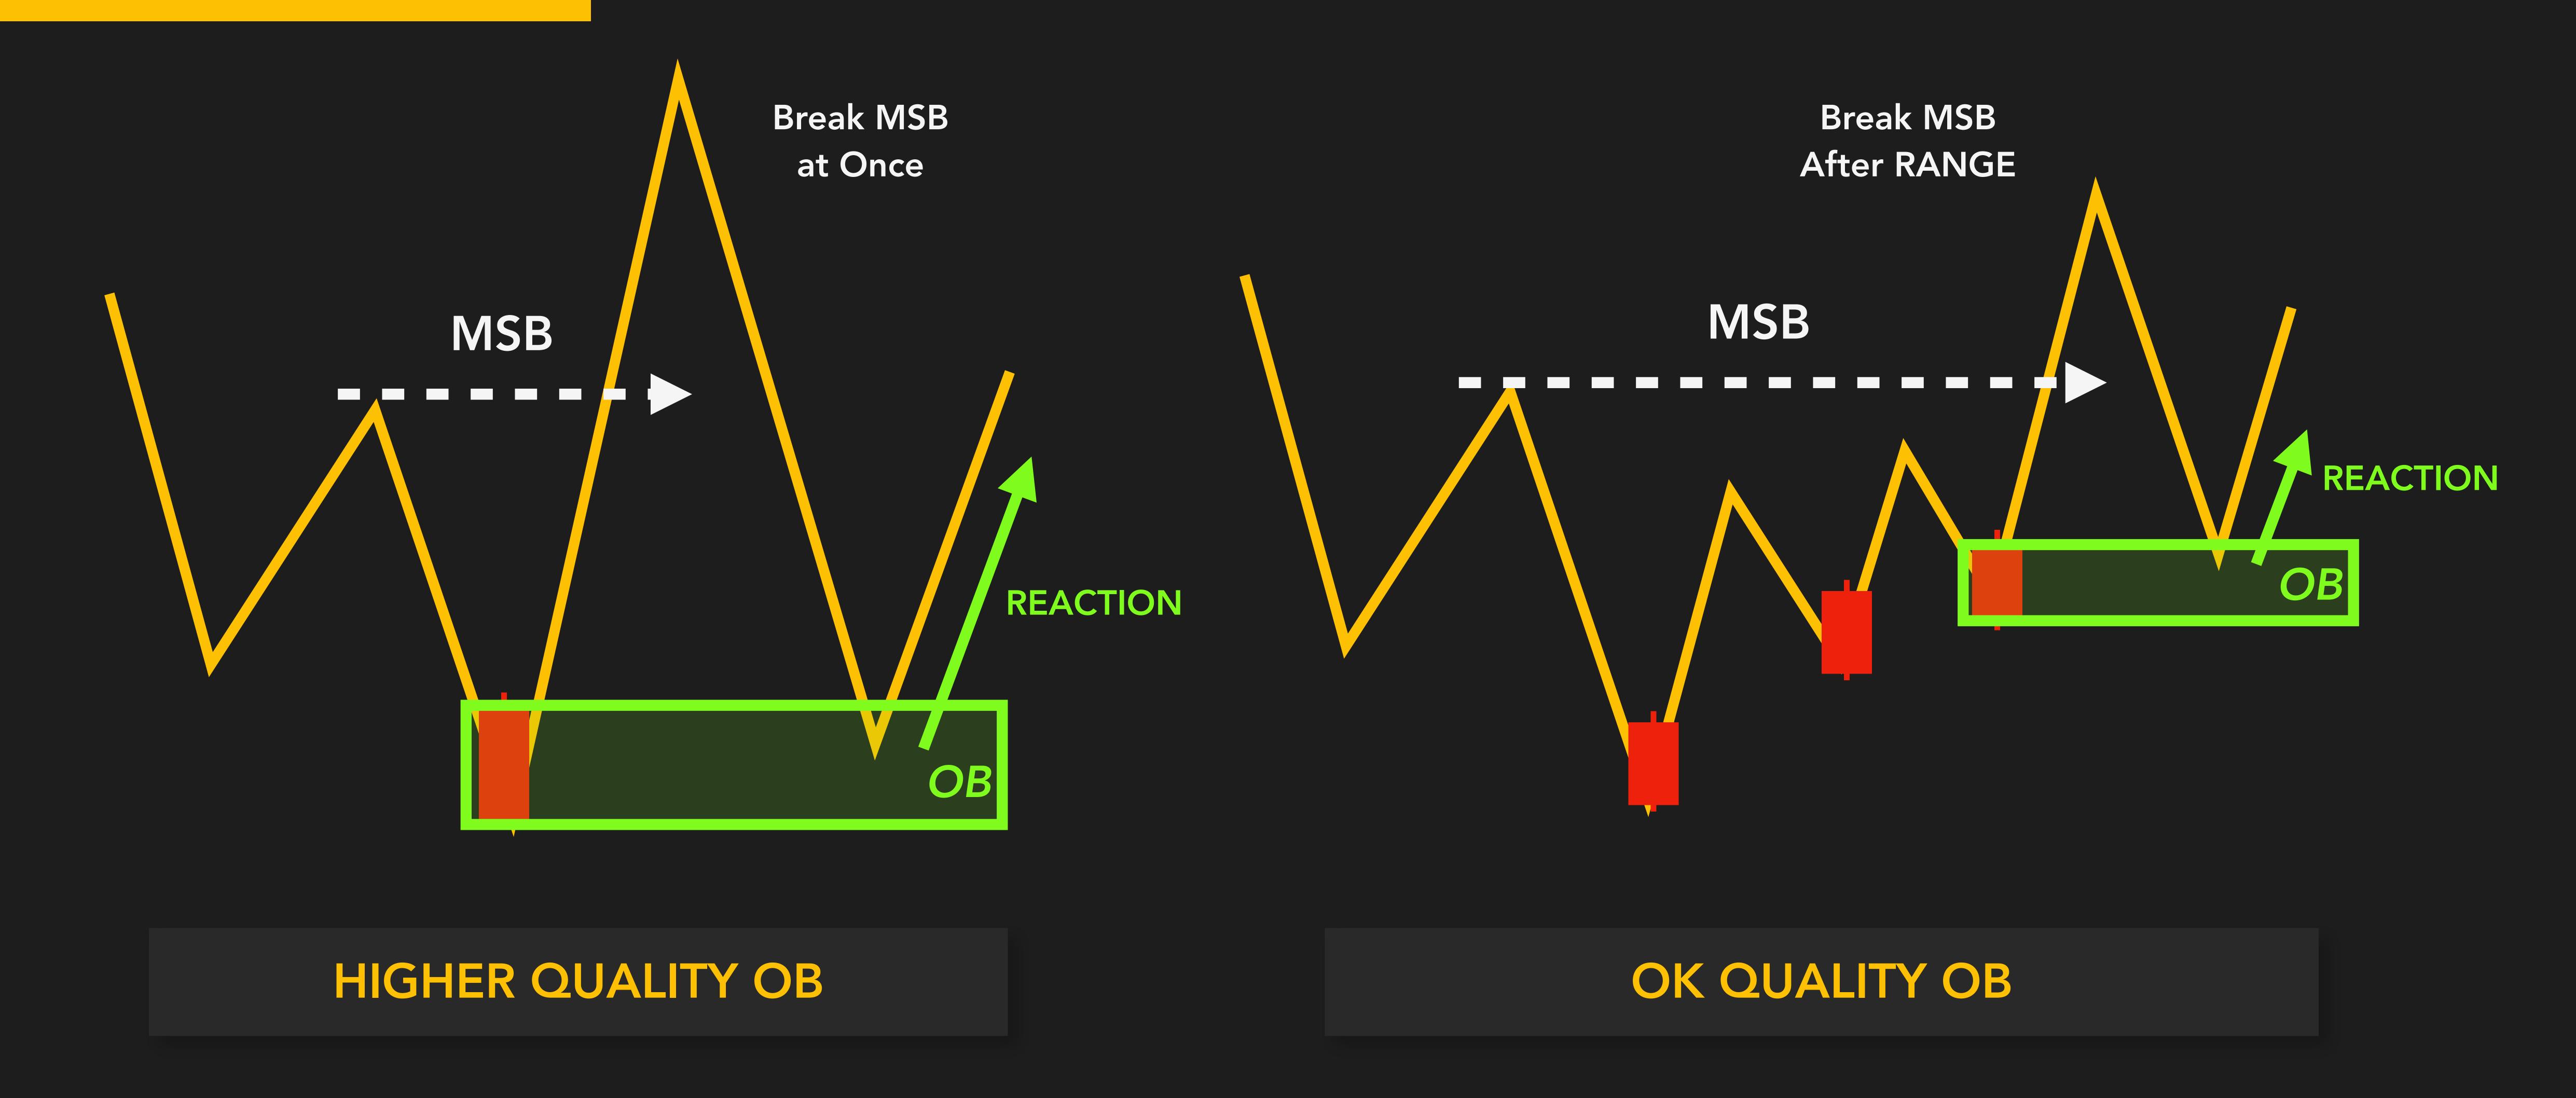

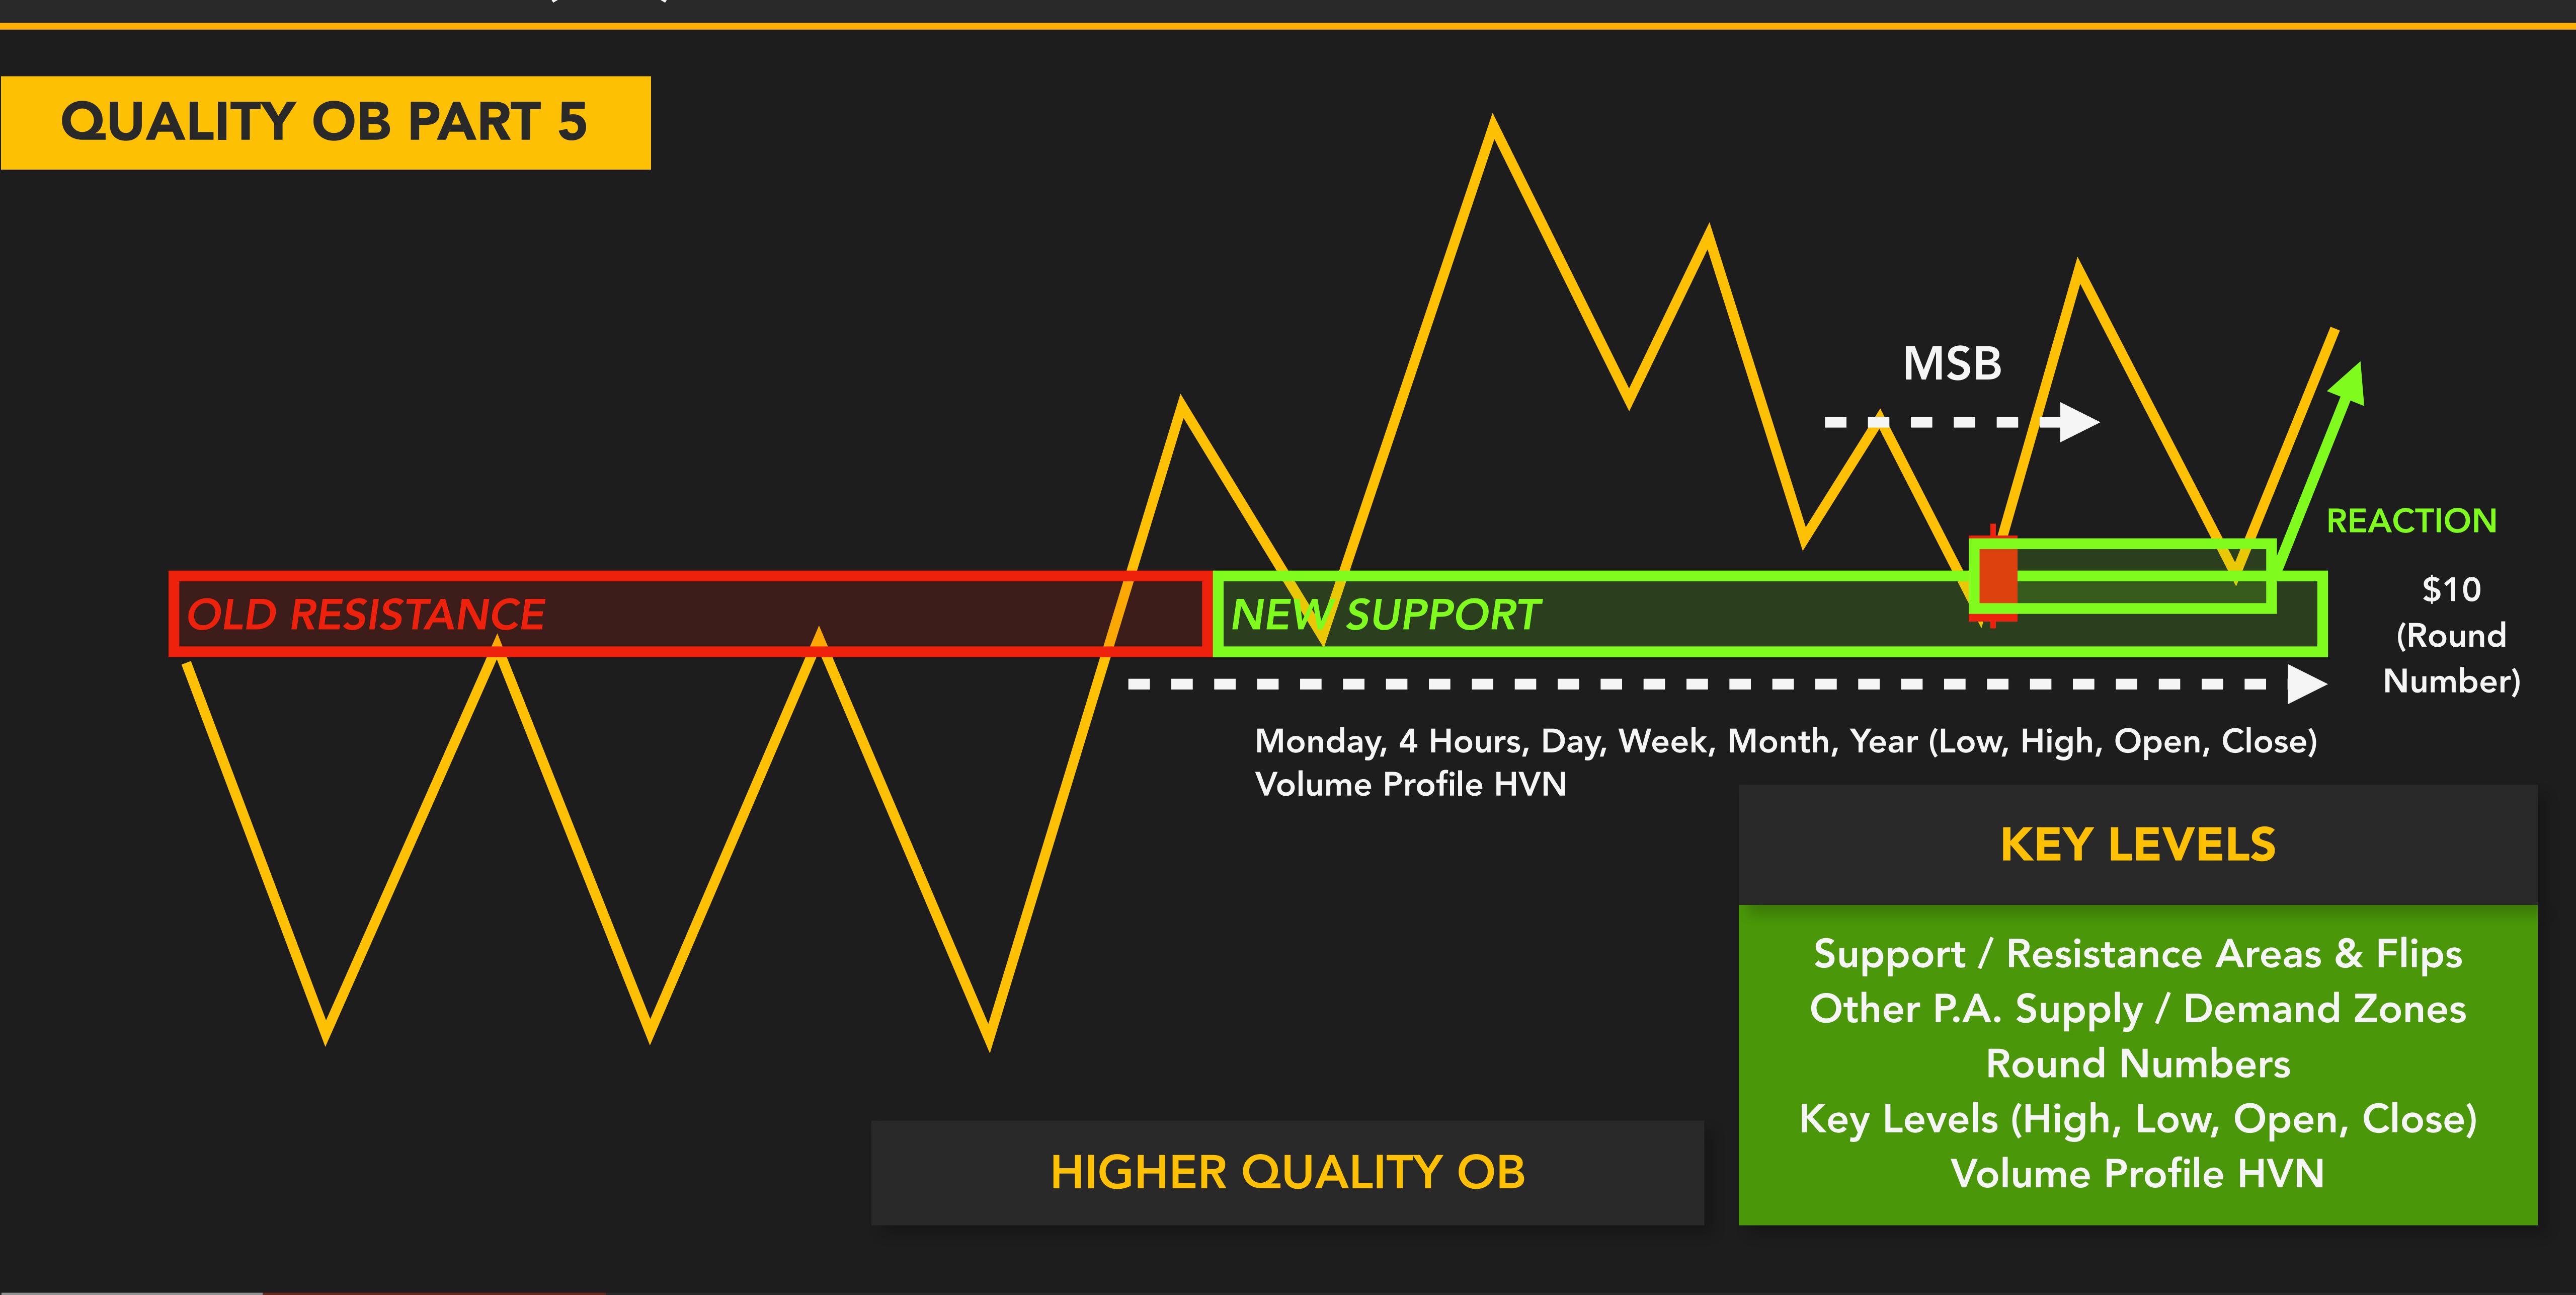

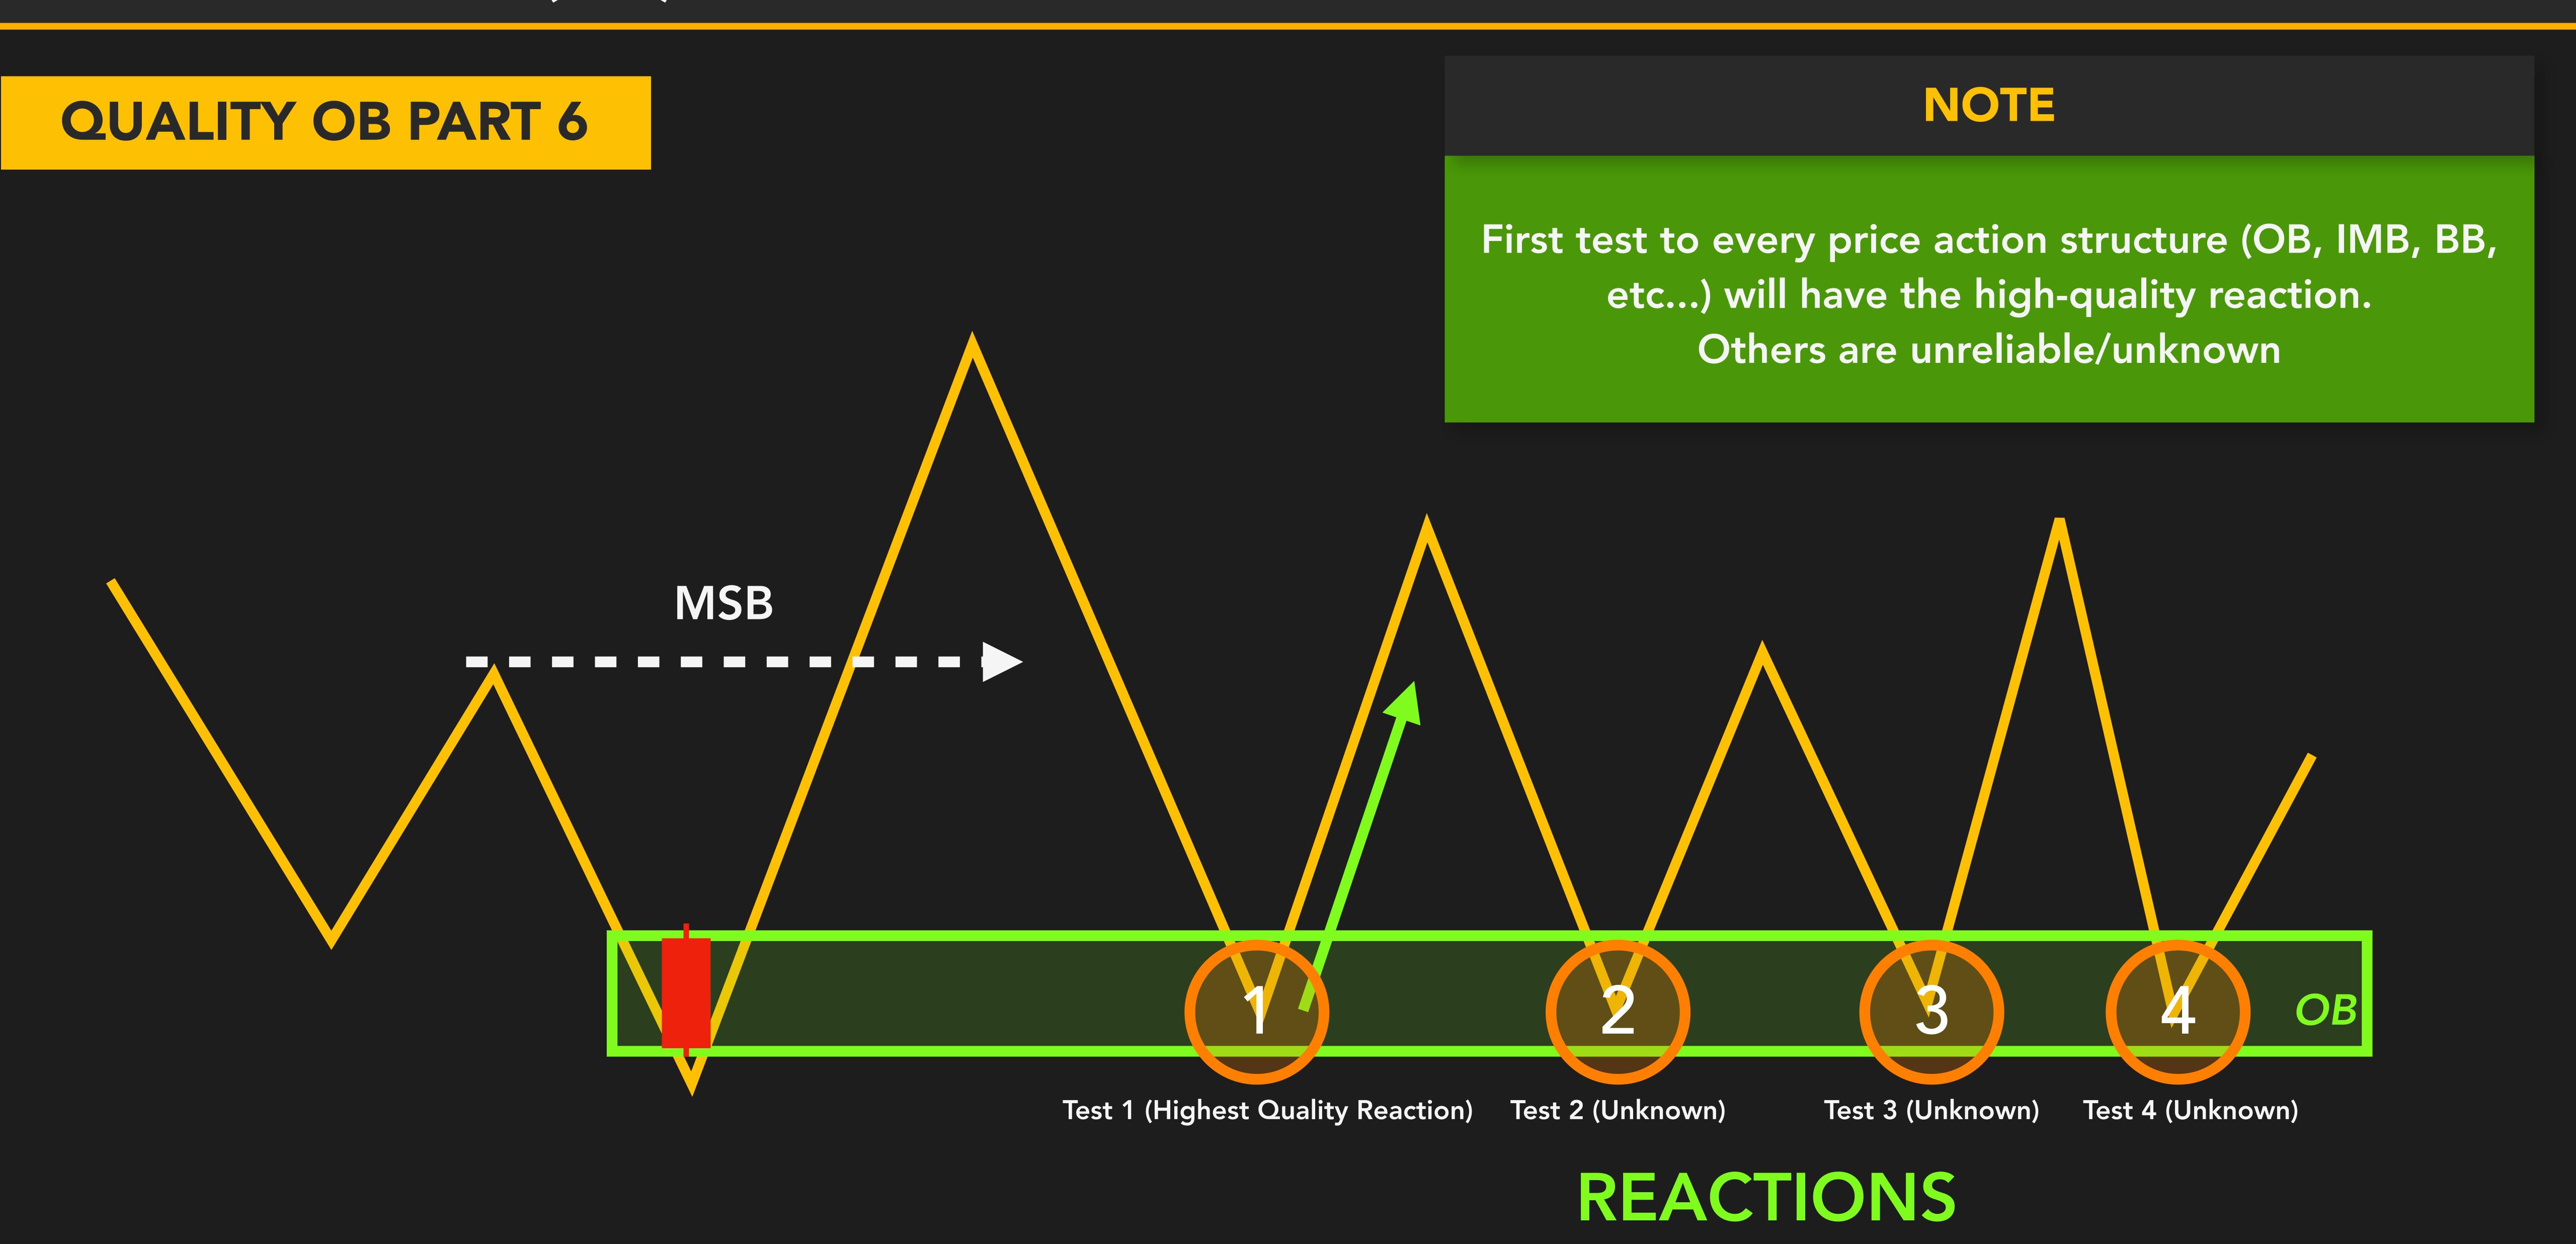

QUALITY OB PART 4

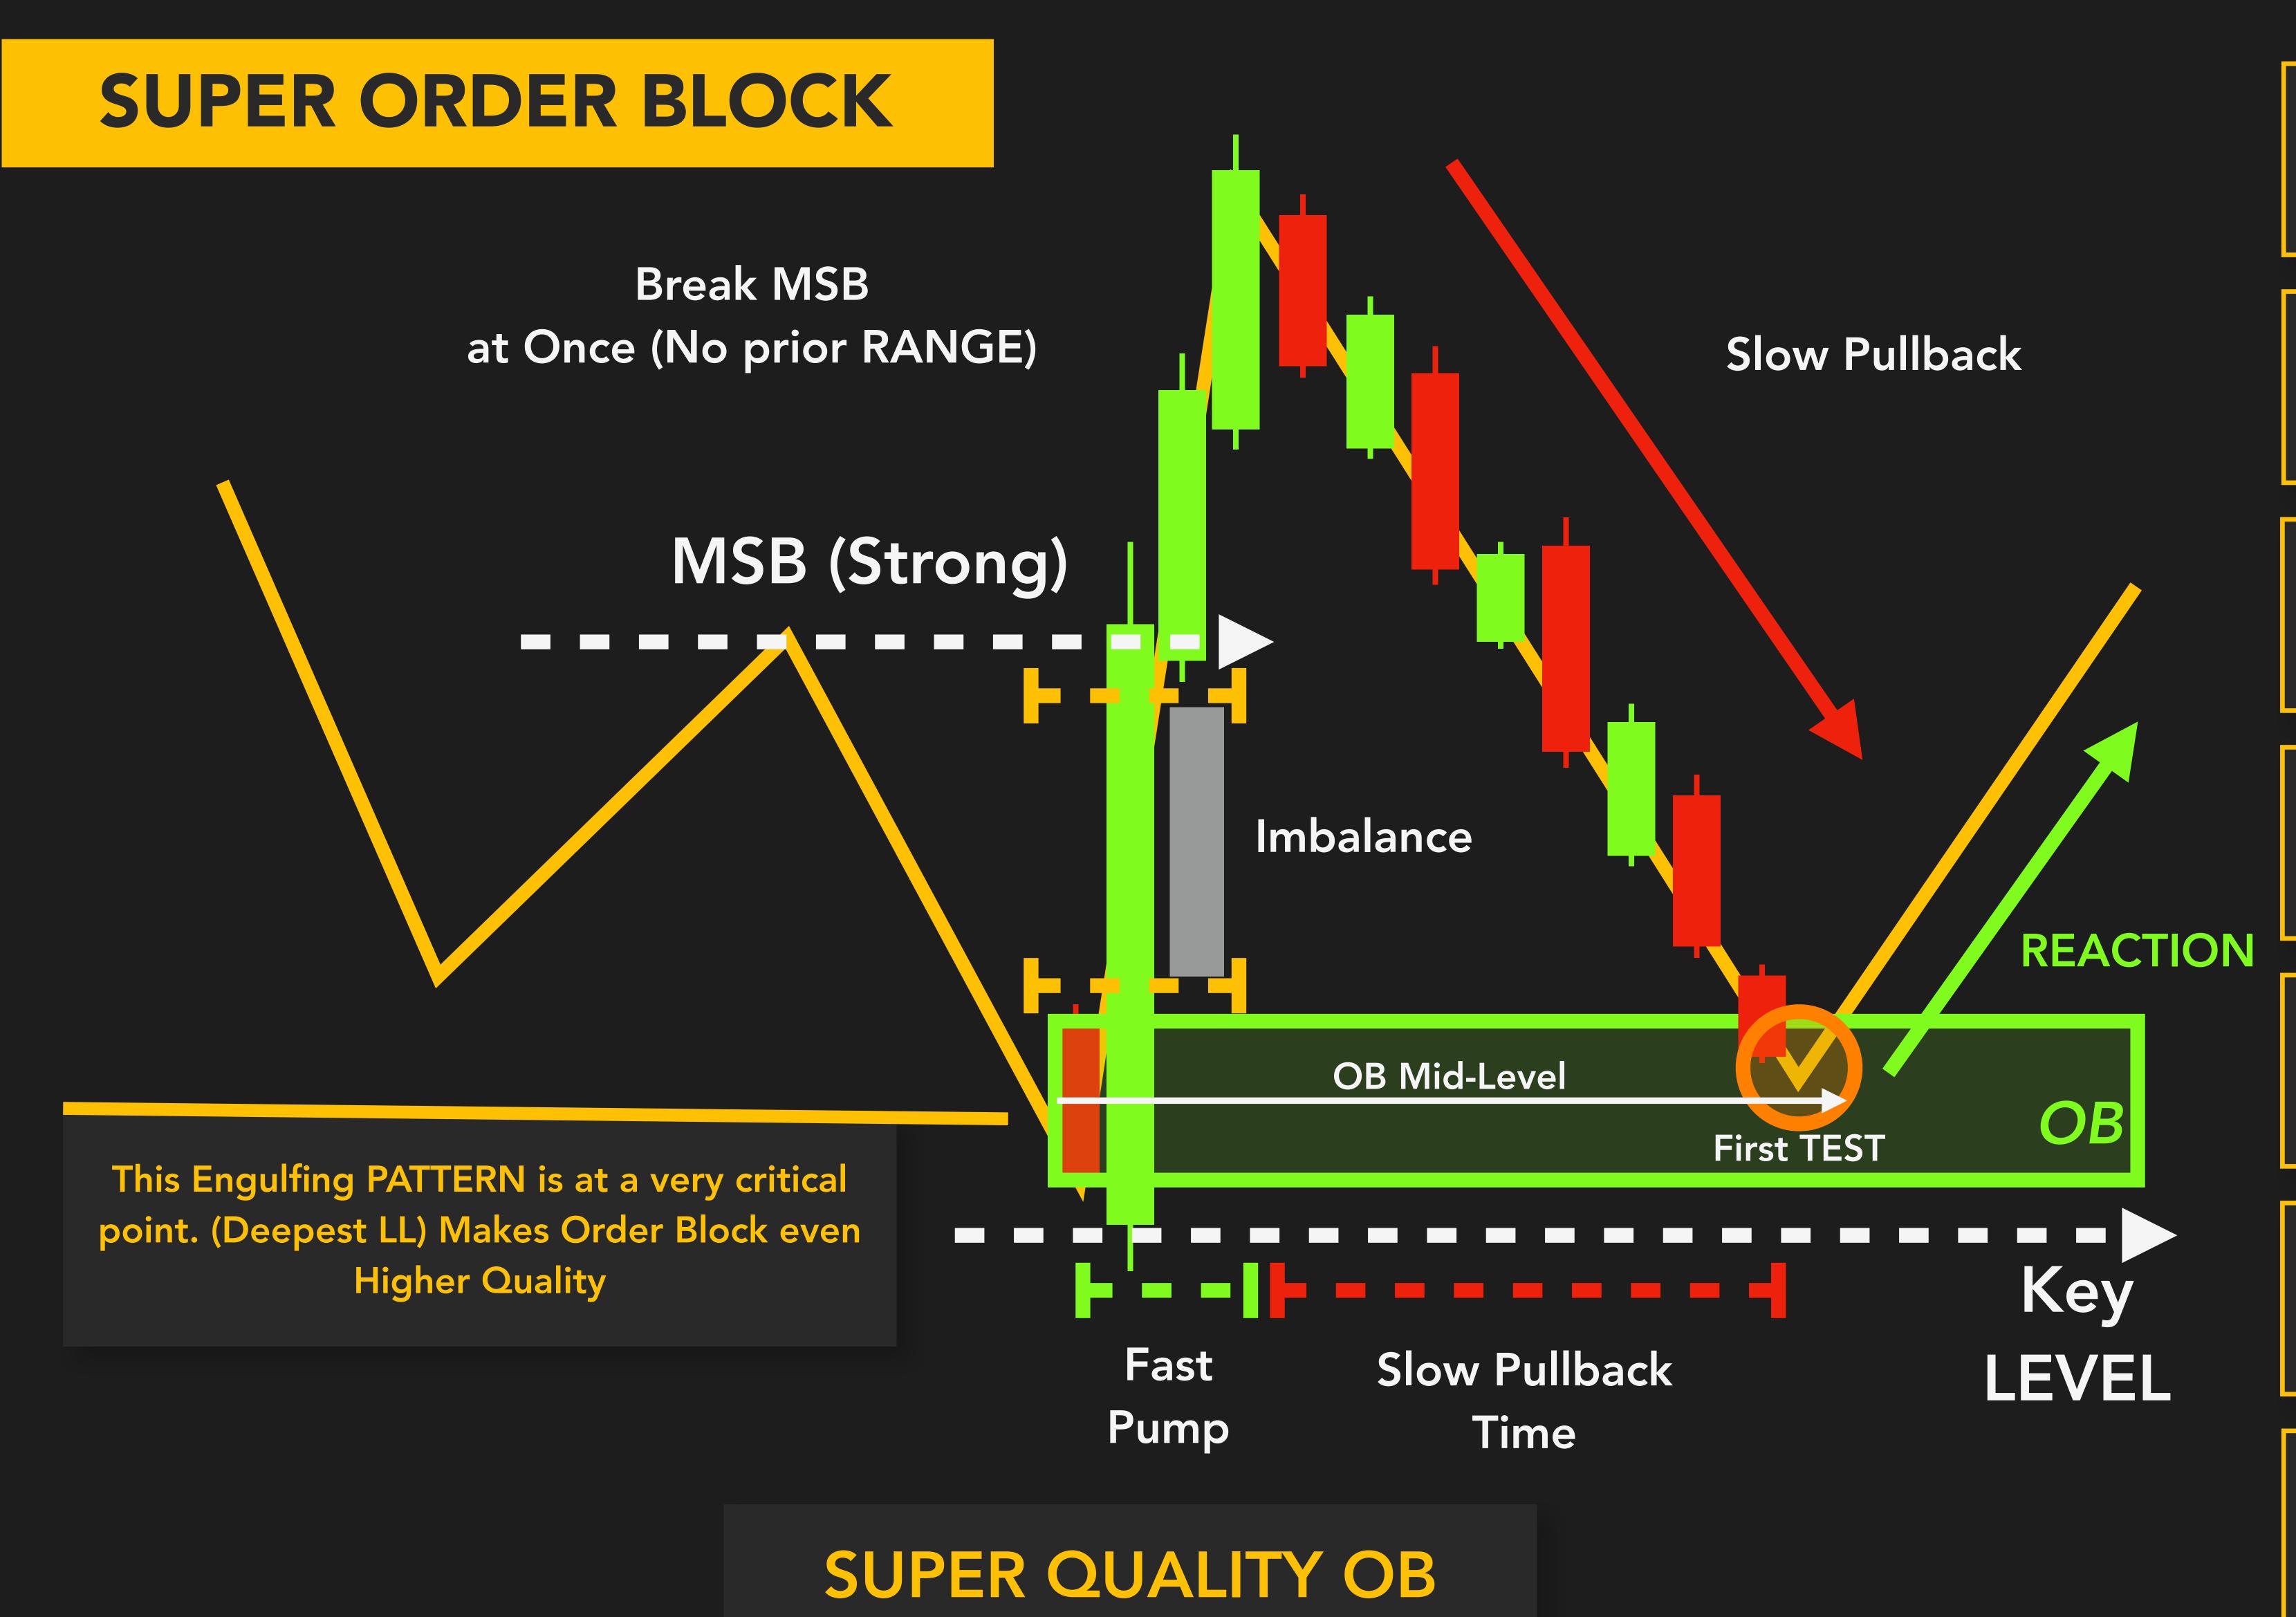

QUALITY OB NOTES

INCREASE OB QUALITY	NO CHANGE or DECREASE OB QUALITY
Works Better on High Time Frames (HTF)	Work Ok on Low Time Frames (LTF)
Key Levels (Support / Resistance) (Monday High, Month Close, Week Low, etc)	No Key Levels
Imbalances, Pumps, Dumps changes market structure, MSB or BoS (Fast Expansion)	No Imbalance, No Big Candlesticks with Volume (Slow expansion)
Engulfing Pattern at Swing Points (HH, HL, LH, LL)	Random Engulfing Patterns
Untested OB zone	Tested OB Zone (Second or More)
Breaks MSB or BoS at once strongly without consolidation/range	Consolidation with little swings before MSB or BoS
Support/Resistance Flip (S/R Flip) Areas	No S/R Flip

- 1. Strong Market Structure Break (MSB)
- 2. MSB happens at once without prior range
- 3. MSB happens with imbalance (pump)
- 4. Engulfing Pattern
- 5. Fast Pump/Dump, Slow Pullback
- 6. Key Levels
- 7. First test to OB Supply/Demand Zone
